

# VESUVE (beta) - Velcade: study of real-life use

Responsable(s) :Fourrier-Reglat Annie, Service de Pharmacologie, CIC-P 0005-INSERM U657- Université Bordeaux Segalen  
Moore Nicholas, Service de Pharmacologie, CIC-P 0005-INSERM U657- Université Bordeaux Segalen

Date de modification : 05/09/2017 | Version : 3 | ID : 3195

## Général

### Identification

Nom détaillé Velcade: study of real-life use

Sigle ou acronyme VESUVE (beta)

Numéro d'enregistrement (ID-RCB ou EUDRACT, CNIL, CPP, etc.) CCTI-RS 05 375, CNIL 1133894

### Thématiques générales

Domaine médical Cancer research  
Hematology

Mots-clés Multiple myeloma, Velcade®, Bortezomib, survival, conditions of use, pharmacoepidemiology, cohort, Department of Pharmacology, Bordeaux

## Responsable(s) scientifique(s)

Nom du responsable Fourrier-Reglat

Prénom Annie

Adresse Bât du Tondu - Case 41 - 146, Rue Léo Saignat - 33076 BORDEAUX Cedex

Téléphone + 33(0)5 57 57 46 75

Email Annie.fourrier@pharmaco.u-bordeaux2.fr

Laboratoire Service de Pharmacologie, CIC-P 0005-INSERM U657- Université Bordeaux Segalen

Organisme Université Bordeaux

Nom du responsable Moore

Prénom Nicholas

| Critère de sélection des participants   | Medication(s) taken  |
| Le recrutement dans la base de données s'effectue dans le cadre d'une étude interventionnelle | No   |

## Informations complémentaires concernant la constitution de l'échantillon

All hospital pharmacies that purchased bortezomib at the time of study implementation were contacted. Pharmacists of participating centres have, from nominative dispensation registers, identified patients who received a first prescription of bortezomib during the study period. The prescribing physicians were contacted and asked to participate in the study. Participating physicians informed patients of the study and gave access to medical records to the CRAs in charge of the data collection.

### Objectif de la base de données

#### Objectif principal

The objectives are to evaluate the response and survival of patients treated by Velcade®, to describe the population of patients initiating treatment with Velcade® (socio-demographic data, previous treatments, indication), and describe the conditions of use Velcade® (dose, number and frequency of treatment cycles)

#### Critères d'inclusion

Patients initiating Bortezomib treatment between 1 May 2004 and April 30 2006 (whether or not treatment is continued); Patient unexposed to bortezomib, including during a clinical trial or temporary use authorization; Patient followed by a hospital physician having agreed to participate in the study; Patient not participating in a clinical trial; Patient not objecting to data collection

### Type de population

#### Age

Adulthood (19 to 24 years)  
Adulthood (25 to 44 years)  
Adulthood (45 to 64 years)  
Elderly (65 to 79 years)  
Great age (80 years and more)

#### Population concernée

Sick population

#### Sexe

Male  
Woman

#### Champ géographique

National

#### Détail du champ géographique

Hospital pharmacists and physicians in metropolitan France

### Collecte

### Dates

|  |   |
|--|---|
| Année du premier recueil                             | 2004  |
| Année du dernier recueil                             | 2006  |
| <b>Taille de la base de données</b>                  |   |
| Taille de la base de données (en nombre d'individus) | [500-1000] individuals  |
| <b>Détail du nombre d'individus</b>                  |   |
|  | 1310 patients identified by hospital pharmacists, including 924 patients for whom their physician agreed to participate in the study, and 793 patients were eligible for follow up.   |
| <b>Données</b>                                       |   |
| Activité de la base                                  | Data collection completed   |
| Type de données recueillies                          | Clinical data   |
| Données cliniques, précisions                        | Direct physical measures  |
| Existence d'une biothèque                            | No  |
| Paramètres de santé étudiés                          | Health event/morbidity<br>Health event/mortality<br>Health care consumption and services  |
| Consommation de soins, précisions                    | Medicines consumption   |
| <b>Modalités</b>                                     |   |
| Mode de recueil des données                          | CRAs have collected data on site using a standardized electronic case report forms (e-CRF). The indication for treatment with bortezomib was collected for all patients, but only those treated for multiple myeloma were followed. |
| Suivi des participants                               | Yes   |
| Détail du suivi                                      | Patients treated for multiple myeloma are followed over three years (from the date of first administration of Velcade®) using data available in medical records.  |
| Appariement avec des sources administratives         | No  |
| <b>Valorisation et accès</b>                         |   |
| Valorisation et accès                                |   |
