

NutriCoviD30 - Food intake and weight loss in the course of COVID-19 infection. A longitudinal study of the multicenter NutriCoviD30 cohort

Head :Marie-France Vaillant, Nutrition

Last update : 01/13/2021 | Version : 1 | ID : 73886

General	
Identification	
Detailed name	Food intake and weight loss in the course of COVID-19 infection. A longitudinal study of the multicenter NutriCoviD30 cohort
Sign or acronym	NutriCoviD30
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	EudraCT/ID-RCB: 2020-A01120-39
General Aspects	
Medical area	Endocrinology and metabolism General practice Infectious diseases Pneumology
Study in connection with Covid-19	Yes
Pathology (details)	Malnutrition
Health determinants	Nutrition
Keywords	COVID-19, pneumonia, weight loss, food intake, sarcopenia, malnutrition
Scientific investigator(s) (Contact)	
Name of the director	Marie-France
Surname	Vaillant
Address	CHU Grenoble Alpes - Clinique de Nutrition Artificielle CS 10217 - 38043 Grenoble cedex 9
Phone	+33 6 06 87 36 83

Main features

Type of database

Type of database	Study databases
------------------	-----------------

Study databases (details)	Cohort study
---------------------------	--------------

Database recruitment is carried out by an intermediary	A selection of health institutions and services
--	---

Database recruitment is made on the basis of:	Another treatment or procedure
---	--------------------------------

Database recruitment is carried out as part of an interventional study	No
--	----

Additional information regarding sample selection.	Inpatients with a confirmed diagnosis of Covid-19 called at home one month after discharge from hospital
--	--

Database objective

Main objective	The aim of this study was to describe the nutritional impact of COVID-19 infection on adult inpatients on the short- to mid-term (up to 30 days after hospital discharge), using food intake and weight measurements. It also aimed to identify factors associated with a decrease in food intake and weight.
Inclusion criteria	<ul style="list-style-type: none"> - Adults inpatients with a confirmed diagnosis of Covid-19 - 30 days delay after discharge from hospital - information and no opposition for data collection and call interview
Population type	
Age	<ul style="list-style-type: none"> Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population
Pathology	X - Diseases of the respiratory system
Gender	<ul style="list-style-type: none"> Male Woman
Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2020
Date of last collection (YYYY or MM/YYYY)	2020
Size of the database	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	403 included
Data	

Database activity	Data collection completed
Type of data collected	Clinical data Declarative data Paraclinical data
Clinical data (detail)	Medical registration
Details of collected clinical data	weight, chronic disease, diet
Declarative data (detail)	Phone interview
Details of collected declarative data	COVID-19 symptoms, difficulties due to lockdown
Paraclinical data (detail)	height, food intake, appetite
Presence of a biobank	No
Procedures	
Data collection method	eCRF
Participant monitoring	No
Followed pathology	
Links to administrative sources	No
