

COVID-OISE - Longitudinal follow-up of a population-based cohort in a French town with intense SARS-CoV-2 circulation in early 2020.

Head :FONTANET Arnaud, Emerging Diseases Epidemiology Unit

Last update : 05/05/2021 | Version : 1 | ID : 73824

General	
Identification	
Detailed name	Longitudinal follow-up of a population-based cohort in a French town with intense SARS-CoV-2 circulation in early 2020.
Sign or acronym	COVID-OISE
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	20.10.05.86816
General Aspects	
Medical area	Immunology Infectious diseases
Study in connection with Covid-19	Yes
Scientific investigator(s) (Contact)	
Name of the director	FONTANET
Surname	Arnaud
Address	25 rue du Dr Roux - 75724 Paris cedex 15
Unit	Emerging Diseases Epidemiology Unit
Organization	Institut Pasteur
Collaborations	
Funding	
Governance of the database	
Sponsor(s) or organisation(s)	Institut Pasteur

responsible	
Organisation status	Private
Presence of scientific or steering committees	Yes
Additional contact	
Name of the contact	PINAUD
Surname	Laurie
Address	25 rue du Dr Roux - 75724 Paris cedex 15
Email	laurie.pinaud@pasteur.fr
Unit	Emerging Diseases Epidemiology Unit
Organization	Institut Pasteur
Name of the contact	FERNANDES-PELLERIN
Surname	Sandrine
Address	28 rue du Dr Roux - 75724 Paris cedex 15
Email	Sandrine.FERNANDESPELLERIN@pasteur.fr
Unit	Coordination clinique du Centre de Recherche Translationnelle
Organization	Institut Pasteur
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out as part of an interventional study	Yes
Details	Performed at individual level
Database objective	
Main objective	Study the changes over time of the specific humoral response generated by SARS-CoV-2 virus

infection in different biological specimens from subjects in different age groups.

Inclusion criteria

1. Person living, working or studying in Crépy-en-Valois or in the surrounding towns
OR in the same household as one of the above persons
OR professional, resident or patient in retirement homes or the Saint-Lazare Hospital long-stay healthcare facility, in Crépy-en-Valois
2. Adult or minor subject from 5 years of age
3. Individual covered by a social security scheme
4. Individual having given their consent to take part in the study after reviewing the information provided by a qualified person representing the principal investigator

Population type

Age

Childhood (6 to 13 years)
Adolescence (13 to 18 years)
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered

General population

Pathology

Gender

Male
Woman

Geography area

Local

Detail of the geography area

Hauts-de-France region, Oise administrative department, around the town of Crépy-en-Valois

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)

2020

Size of the database

Size of the database (number of individuals)

[1000-10 000[individuals

Details of the number of individuals

Approximately 2,300 subjects in total

Data	
Database activity	Current data collection
Type of data collected	Clinical data Declarative data Biological data Administrative data
Clinical data (detail)	Direct physical measures
Declarative data (detail)	Internet self-questionnaire Face to face interview
Presence of a biobank	Yes
Contents of biobank	Serum Blood cells isolated Fluids (saliva, urine, amniotic fluid, ?)
Procedures	
Participant monitoring	Yes
Monitoring procedures	Monitoring by contact with the participant (mail, e-mail, telephone etc.)
Details on monitoring of participants	4 visits spread over 2 years
Links to administrative sources	No
