Data

Database activity	Data collection completed
-------------------	---------------------------

Type of data collected	Declarative data
------------------------	------------------

Declarative data (detail)	Paper self-questionnaire
---------------------------	--------------------------

Presence of a biobank	No
-----------------------	----

Health parameters studied	Health event/morbidity Health event/mortality
---------------------------	--

Procedures

Data collection method	Data gathered by auto-questionnaire, filled up by the patients and their doctors.
------------------------	---

Participant monitoring	No
------------------------	----

Links to administrative sources	No
---------------------------------	----

Promotion and access

Promotion

Access

Terms of data access (charter for data provision, format of data, availability delay)	To be defined
---	---------------

Access to aggregated data	Access on specific project only
---------------------------	---------------------------------

Access to individual data	Access on specific project only
