

# KABP Antilles-Guyane 2004 and 2011-2012 - Cross-sectional Survey on Knowledge, Attitudes, Beliefs and Practices Regarding HIV/AIDS and Other Sexual Risks in The West Indies and French Guiana

Head :Halfen Sandrine  
Lydié Nathalie

Last update : 08/20/2014 | Version : 1 | ID : 8460

General	
Identification	
Detailed name	Cross-sectional Survey on Knowledge, Attitudes, Beliefs and Practices Regarding HIV/AIDS and Other Sexual Risks in The West Indies and French Guiana
Sign or acronym	KABP Antilles-Guyane 2004 and 2011-2012
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	Accord CNIL via institut de sondage
General Aspects	
Medical area	General practice Infectious diseases
Health determinants	Geography Social and psychosocial factors
Others (details)	HIV, AIDS, Elective abortion
Keywords	HIV/AIDS, sexually transmitted infections, vulnerability, sexual risk, unplanned pregnancy, elective abortion, condoms, sexual health, representation, social inequality, general population, prevention, contraception
Scientific investigator(s) (Contact)	
Name of the director	Halfen
Surname	Sandrine
Address	43 rue Beaubourg, 75003 Paris, France
Phone	+33 (0)1 77 49 78 59

Email	s.halfen@ors-idf.org
Organization	Observatoire régional de santé
Name of the director	Lydié
Surname	Nathalie
Address	42, bd de la Libération, 93203 Saint Denis Cedex
Email	nathalie.lydie@inpes.sante.fr
Organization	INPES
Collaborations	
Participation in projects, networks and consortia	Yes
Funding	
Funding status	Public
Details	2011 : ANRS, INPES, Ministère en charge de la Santé, Ministère des Outre-mer, DREES 2004 : ANRS, Fondation de France
Governance of the database	
Sponsor(s) or organisation(s) responsible	Observatoire régional de santé d'Île-de-France
Organisation status	Public
Sponsor(s) or organisation(s) responsible	INPES
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A population file

Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	The survey was conducted by random sampling using telephone subscriber lists (public or non-public). To account for technological developments and to ensure better representation, random number generation was used in order to include people exclusively equipped with mobile phones.
Database objective	
Main objective	Twenty years after the first AIDS cases were reported in French départements in the Americas, the KABP general population survey aims to characterise social representations that populations residing in these départements have concerning HIV/AIDS, their knowledge of transmission routes and treatment, their attitude towards people affected by HIV, their knowledge of HIV transmission risk and adaptation in response to this risk. The objective of the 2011-2012 survey is to determine the knowledge, attitudes, beliefs and practices regarding HIV/AIDS in French Guiana, Martinique and Guadeloupe (transmission routes, protection, screening etc.) as well as sexual risk, elective abortion, contraception and other sexual health related topics, in order to characterise specific aspects of French départements in the Americas and developments since the KABP Antilles-Guyane 2004 survey.
Inclusion criteria	<ul style="list-style-type: none"> <li>- Aged between 15 and 69 years old - mainly residing in Guadeloupe, Martinique or French Guiana</li> <li>- French or Creole speaking - verbal consent</li> </ul>
Population type	
Age	<ul style="list-style-type: none"> <li>Adolescence (13 to 18 years)</li> <li>Adulthood (19 to 24 years)</li> <li>Adulthood (25 to 44 years)</li> <li>Adulthood (45 to 64 years)</li> </ul>
Population covered	General population
Gender	<ul style="list-style-type: none"> <li>Male</li> <li>Woman</li> </ul>
Geography area	Departmental
French regions covered by the	Guadeloupe

database	Guyane Martinique
Detail of the geography area	Guadeloupe, Martinique, French Guiana
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2004
Date of last collection (YYYY or MM/YYYY)	02/2012
Size of the database	
Size of the database (number of individuals)	[1000-10 000[ individuals
Details of the number of individuals	2011: 4933 (~1500/Guadeloupe, 1500/Martinique, 1800/Guyane) 2004: 3014 (~1000/Guadeloupe, 1000/Martinique, 1000/Guyane)
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Phone interview
Presence of a biobank	No
Health parameters studied	Health care consumption and services Others
Care consumption (detail)	Medical/paramedical consultation
Other (detail)	Knowledge, Opinions, Perception and Behaviours (sexual and preventive)
Procedures	
Participant monitoring	No
Links to administrative sources	No
Promotion and access
