SRCV - Annual Survey on Income and Living Conditions Statistics

Head :Houdre Cédric

Last update : 08/14/2014 | Version : 1 | ID : 8433

General

Identification

Detailed name	Annual Survey on Income and Living Conditions Statistics
Sign or acronym	SRCV
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	--

General Aspects

Medical area	General practice
Health determinants	Occupation Social and psychosocial factors
Keywords	European survey on income and living conditions, income, poverty, social exclusion, financial situation, deprivation., EU-SILC

Scientific investigator(s) (Contact)

Name of the director	Houdre
Surname	Cédric
Address	18 Boulevard Adolphe Pinard 75675 PARIS Cedex 14
Phone	+33 (0)1 41 17 54 70
Email	cedric.houdre@insee.fr
Organization	INSEE

Collaborations

Funding

Funding status	Public
Details	INSEE

Governance of the database

Sponsor(s) or organisation(s) responsible	INSEE - Institut national de la statistique et des études économiques
Organisation status	Public

Additional contact

Main features

Type of database

Type of database	Health relevant administrative databases
Database recruitment is carried out by an intermediary	A population file An administrative base or a register
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	The sampling system from the SRCV survey is based on a master sample from the 1999 Census and is supplemented by the new housing framework database (BSLN). Due to the new "continuous" census methodology since 2010, which provides partial coverage of the territory each year (total coverage within a 5-year cycle), a complete overhaul of the current sampling system took place. The new OCTOPUSSE (Organisation coordonnée de tirages optimisés pour une utilisation statistique des échantillons) sampling system allows samples to be drawn from household surveys in a given list of dwellings surveyed the preceding year, thus ensuring continuous framework updates and rendering specific monitoring of new housing unnecessary. The selection of entrant samples from the SRCV instrument has been carried out with the new OCTOPUSSE framework since 2010.

Database objective

Main objective	The "Statistiques sur les ressources et conditions de vie" (SRCV) instrument is the French part of the The European Union Statistics on Income and Living Conditions system (EU-SILC). The EU-SILC

statistical system aims to produce structural indicators of income dispersal, poverty and exclusion comparable with other countries in the European Union. It is part of the Community action programme to combat social exclusion and provide statistical material in a European Commission annual summary report on these issues. It also aims to provide researchers with a micro-database on income and living conditions, so that they may carry out comparative studies on inequality and the role of social and fiscal policies regarding redistribution. European regulation establishes a common framework for the systematic production of Community statistics on income and living conditions, including cross-sectional and longitudinal data. This regulatory network's main objective is to establish comparable statistics between Member States, including reports on the quality of data and structural indicators established each year. The regulatory network organises the target "primary" areas each year (database, income, social exclusion, work, housing, education, health) and "secondary" areas in ad-hoc fields (material deprivation, debt, financial situation of households), which have been defined at the Commission initiative since 2005.

Inclusion criteria	- at least 16 years old

Population type

Age	Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	General population
Gender	Male Woman
Geography area	National
Detail of the geography area	Metropolitan France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	2004

Size of the database

Size of the database (number of individuals)	Greater than 20 000 individuals
Details of the number of individuals	14 000 ménages/an - 14 000 families/year

Data

Database activity	Current data collection
Type of data collected	Declarative data Administrative data
Declarative data (detail)	Face to face interview
Administrative data (detail)	Administrative data, tax returns and social allowance records from management bodies (CNAF, MSA and CNAV)
Presence of a biobank	No
Health parameters studied	Health event/morbidity Quality of life/health perception

Procedures

Data collection method	The survey is carried out face-to-face from May to June by a computer assisted collection (CAPI).
Participant monitoring	Yes
Links to administrative sources	Yes
Linked administrative sources (detail)	CNAF, MSA and CNAV
