Women between 18 and 44 years old residing in France

Population type

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	General population
Gender	Woman
Geography area	National
Detail of the geography area	Metropolitan France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	11/2000
Date of last collection (YYYY or MM/YYYY)	01/2005
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	2863
Data	
Database activity	Current data collection
Type of data collected	Declarative data
Declarative data (detail)	Face to face interview
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality Health care consumption and services
Care consumption (detail)	Medical/paramedical consultation Medicines consumption
Procedures	
Data collection method	Interview: direct input
Participant monitoring	Yes

Details on monitoring of participants	Follow-up duration: 4 years
