I-SYPRES - Observational study on the diagnostic elements of Heart Failure with Preserved Systolic Function (HF-PSF) in private practice

Head: Vignal Franck, Sanofi Aventis

Details

Last update : 01/01/2019 Version : 1 ID : 89		
General		
Identification		
Detailed name	Observational study on the diagnostic elements of Heart Failure with Preserved Systolic Function (HF-PSF) in private practice	
Sign or acronym	I-SYPRES	
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL n° 907194	
General Aspects		
Medical area	Cardiology	
Others (details)	Heart Failure with Preserved Systolic Function	
Keywords	metabolic and cardiological risk factors	
Scientific investigator(s) (Contact)		
Name of the director	Vignal	
Surname	Franck	
Phone	+33 (0)1 57 63 26 47	
Email	franck.vignal@sanofi-aventis.com	
Unit	Sanofi Aventis	
Collaborations		
Funding		
Funding status	Private	

sanofi-aventis

Governance of the database	
Sponsor(s) or organisation(s) responsible	Sanofi-aventis France
Organisation status	Private
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Longitudinal study (except cohorts)
Database recruitment is carried out by an intermediary	A selection of health care professionals
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Consecutive inclusion of 4 eligible patients per physician
Database objective	
Main objective	Describe in private cardiology practice the diagnostic elements of Heart Failure with Preserved Systolic Function (HF-PSF) for patients: - for whom the private cardiologist makes an initial diagnosis of HF-PSF, - monitored through appointments and for whom the HF-PSF diagnosis was made during hospitalization
Inclusion criteria	Aged over 18; Presenting HF-PSF that has been diagnosed in the past 6 months either by a private cardiologist or during hospitalization; Agreeing to take part in the study
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years)
Population covered	Sick population

Gender	Male Woman
Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2007
Date of last collection (YYYY or MM/YYYY)	2009
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	1168
Data	
Database activity	Data collection completed
Database activity Type of data collected	Data collection completed Clinical data Biological data
-	Clinical data
Type of data collected	Clinical data Biological data
Type of data collected Clinical data (detail)	Clinical data Biological data Direct physical measures creatinine levels, blood sodium levels, blood
Type of data collected Clinical data (detail) Biological data (detail)	Clinical data Biological data Direct physical measures creatinine levels, blood sodium levels, blood glucose, hemoglobin levels
Type of data collected Clinical data (detail) Biological data (detail) Presence of a biobank	Clinical data Biological data Direct physical measures creatinine levels, blood sodium levels, blood glucose, hemoglobin levels No Health event/morbidity
Type of data collected Clinical data (detail) Biological data (detail) Presence of a biobank Health parameters studied	Clinical data Biological data Direct physical measures creatinine levels, blood sodium levels, blood glucose, hemoglobin levels No Health event/morbidity
Type of data collected Clinical data (detail) Biological data (detail) Presence of a biobank Health parameters studied Procedures	Clinical data Biological data Direct physical measures creatinine levels, blood sodium levels, blood glucose, hemoglobin levels No Health event/morbidity Health event/mortality
Type of data collected Clinical data (detail) Biological data (detail) Presence of a biobank Health parameters studied Procedures Participant monitoring Details on monitoring of	Clinical data Biological data Direct physical measures creatinine levels, blood sodium levels, blood glucose, hemoglobin levels No Health event/morbidity Health event/mortality Yes
