Unit	Bristol-Myers Squibb
Collaborations	
Funding	
Funding status	Private
Details	Bristol-Myers Squibb France
Governance of the database	
Sponsor(s) or organisation(s) responsible	Bristol-Myers Squibb France (BMS)
Organisation status	Private
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	random sampling in clusters.
Database objective	
Main objective	Describe the persistence of secondary prevention therapeutics, between 3 and 18 months after hospitalization for a first acute coronary syndrome (ACS), in patients monitored by private or hospital cardiologists

Inclusion criteria	M/F >=18 years, outpatient seen in cardiology consultation, hospitalized in 2005 for a first ACS
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	Metropolitan France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2006
Date of last collection (YYYY or MM/YYYY)	2007
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	1801
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Biological data
Clinical data (detail)	Direct physical measures
Biological data (detail)	total cholesterol, HDL, LDL, Triglycerides, glycemia
Presence of a biobank	No
Health parameters studied	Health care consumption and services

Care consumption (detail)

Medicines consumption

Procedures

Data collection method

Paper CRF

Participant monitoring

No
