

# APTOR - Prospective observational study of patients with acute coronary syndrome managed by PCI and antiplatelet treatment: Antiplatelet Treatment Observational Registry

Head :Médecin pharmacoépidémiologiste

Last update : 01/01/2018 | Version : 2 | ID : 71

## General

### Identification

Detailed name Prospective observational study of patients with acute coronary syndrome managed by PCI and antiplatelet treatment: Antiplatelet Treatment Observational Registry

Sign or acronym APTOR

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation CNIL N°906309

### General Aspects

Medical area Cardiology

Keywords Resource use, acute coronary syndrome, percutaneous angioplasty, antiplatelet treatment

### Scientific investigator(s) (Contact)

Name of the director Médecin pharmacoépidémiologiste

Main features

Type of database

Type of database

Study databases

Study databases (details)

Longitudinal study (except cohorts)

Database recruitment is carried out by an intermediary

A selection of health institutions and services

Database recruitment is made on the basis of:

Another treatment or procedure

Database recruitment is carried out as part of an interventional study

No

Additional information regarding sample selection.

Patients recruited by cardiologists in interventional cardiology centers

Database objective

Main objective

Primary objective: evaluate the use of healthcare resources and cost in the 12 months following a percutaneous coronary intervention (PCI) combined with antiplatelet treatment in patients with acute coronary syndrome.  
Secondary objectives: quality of life and clinical evolution.

Inclusion criteria

Be diagnosed with acute coronary syndrome,  
- treatment with percutaneous coronary intervention in routine care;  
- start or continue antiplatelet treatment.

Population type

Age

Adulthood (19 to 24 years)  
Adulthood (25 to 44 years)  
Adulthood (45 to 64 years)  
Elderly (65 to 79 years)  
Great age (80 years and more)

Population covered

Sick population

Gender

Male

Woman

Geography area International

Detail of the geography area France, Spain and Great Britain

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY) 2007

Date of last collection (YYYY or MM/YYYY) 2008

### Size of the database

Size of the database (number of individuals) [1000-10 000[ individuals

Details of the number of individuals 1525

### Data

Database activity Data collection completed

Type of data collected Clinical data  
Declarative data

Clinical data (detail) Direct physical measures  
Medical registration

Declarative data (detail) Paper self-questionnaire

Presence of a biobank No

Health parameters studied Health event/morbidity  
Health care consumption and services  
Quality of life/health perception

Care consumption (detail) Hospitalization  
Medical/paramedical consultation  
Medicines consumption

### Procedures

Data collection method Study data collection form

Participant monitoring Yes

Details on monitoring of participants	1 year monitoring
