Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A population file
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Telephone survey (CATI) 1999 and 2002 survey years: picking of households, picking of a 15-75 year-old individual from the household using the quota method. The criteria selected for the quotas are gender, age, profession of the head of household, region and category of urban area. When an individual selected cannot come to the phone at the time of the call, a meeting may be arranged, which the CATI system manages when necessary.

Complementary survey through an abridged questionnaire to 200 users of cell phones only (without household subscription to a landline). 2008 survey year: Random sampling with two representative samples, one concerning people with a landline and the other those with only a cell phone. Sampling of landlines by two-tiered sampling with the household being picked by incrementation method and then the individual being selected by the KISH questioning method. Sampling of cell phones by generating random numbers - respecting the market shares of the 3 main operators.

Database objective

Main objective	Current perceptions and opinions of 15-75 year-olds French people of licit and illicit psychoactive substances and the main public initiatives.
----------------	---

Inclusion criteria	General population, individuals aged 15 to 75.
--------------------	--

Population type

Age	Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years)
-----	--

Population covered	General population
--------------------	--------------------

Gender	Male Woman
--------	---------------

Geography area	National
----------------	----------

Detail of the geography area	Metropolitan France
------------------------------	---------------------

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	1999
--	------

Date of last collection (YYYY or MM/YYYY)	2008
---	------

Size of the database

Size of the database (number of individuals)	[1000-10 000[individuals
--	---------------------------

Details of the number of individuals	2 300
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Phone interview
Presence of a biobank	No
Health parameters studied	Others
Other (detail)	Substance use and product dangerousness
Procedures	
Data collection method	Telephone interview
Participant monitoring	No
Links to administrative sources	No
Promotion and access	
Promotion	
Link to the document	http://www.ofdt.fr/ofdtdev/live/publi/tend/tend71.html
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Main method of disseminating the results: Report
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
