## Population type

Age  
Adulthood (19 to 24 years)  
Adulthood (25 to 44 years)  
Adulthood (45 to 64 years)  
Elderly (65 to 79 years)

Population covered  
Sick population

Gender  
Male  
Woman

Geography area  
Local

French regions covered by the database  
Île-de-France

Detail of the geography area  
Liver and kidney transplantation centres in the Université de Paris Sud

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY)  
09/2002

### Size of the database

Size of the database (number of individuals)  
[500-1000[ individuals

Details of the number of individuals  
720 sujets inclus/inclusions 540 greffés/transplanted patients

### Data

Database activity  
Data collection completed

Type of data collected  
Clinical data  
Declarative data

Clinical data (detail)  
Direct physical measures  
Medical registration

Declarative data (detail)  
Paper self-questionnaire  
Face to face interview

Presence of a biobank  
No

Health parameters studied  
Health event/morbidity  
Health event/mortality

## Procedures

Data collection method	Self-administered questionnaire: manual input Interviews: entry from a paper questionnaire; Clinical examinations: handwritten Biological analysis: handwritten
------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Participant monitoring	Yes
------------------------	-----

Details on monitoring of participants	Follow-up duration: 5 years
