of office based and hospital pneumologists and allergy specialists. Physicians are randomized from the national Cégédim's TVF database (random sampling without reset)

Data collection

Dates

Date of first collection (YYYY or MM/YYYY) 2004

Date of last collection (YYYY or MM/YYYY) 2004

Size of the database

Size of the database (number of individuals) [1000-10 000[individuals

Details of the number of individuals 1599

Data

Database activity Data collection completed

Type of data collected Clinical data

Clinical data (detail) Direct physical measures

Presence of a biobank No

Health parameters studied Health event/morbidity

Procedures

Classifications used GINA classification

Participant monitoring No

Links to administrative sources No

Promotion and access

Promotion

Access

Terms of data access (charter for data provision, format of data, availability delay) Methods for accessing the database are currently being defined

Access to aggregated data

Access on specific project only

Access to individual data

Access on specific project only
