

ESCAL - Survey on Health and Eating Behaviours in Martinique

Head :Quénel Philippe, Directeur du LERES - IRSET U1085 Inserm

Last update : 09/05/2017 | Version : 1 | ID : 8287

General	
Identification	
Detailed name	Survey on Health and Eating Behaviours in Martinique
Sign or acronym	ESCAL
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	Accord CNIL
General Aspects	
Medical area	Endocrinology and metabolism Psychology and psychiatry
Health determinants	Nutrition
Others (details)	Nutrition
Keywords	Nutrient intake, risk factors, nutritional status, eating habits, Martinique.
Scientific investigator(s) (Contact)	
Name of the director	Quénel
Surname	Philippe
Address	Avenue du Prof Léon Bernard F-35043 Rennes cedex
Email	philippe.quenel@ehesp.fr
Unit	Directeur du LERES - IRSET U1085 Inserm
Organization	EHESP School of Public
Collaborations	
Funding	

Funding status	Public
Details	- La Caisse générale de sécurité sociale de Martinique - La Cellule interrégionale d'épidémiologie Antilles-Guyane - La Direction de la santé et du développement social de Martinique - L'Institut de veille sanitaire - Le Ministère de l'outre-mer - L'Observatoire de la santé de la Martinique
Governance of the database	
Sponsor(s) or organisation(s) responsible	Cellule interrégionale d'épidémiologie (Cire) Antilles-Guyane
Organisation status	Public
Sponsor(s) or organisation(s) responsible	Observatoire de la Santé de la Martinique
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	An administrative base or a register
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	The sampling framework is based on 15 INSEE blocks. There are approximately 4,000 blocks on the island of Martinique. The sampling framework was stratified by affiliation or non-affiliation to an area potentially contaminated with organochlorine pesticides and a greater sampling rate was applied to the potentially contaminated area. A random sampling (in clusters) was carried out in each stratum by two degrees: - random selection of blocks according to the proportional number of main residences followed by random selection of 5 main homes per block. Finally an interview was carried out with all inhabitants residing in the home.

Database objective

Main objective	The initial objectives of the health and eating habits survey were to identify: - The frequency of major diseases or their risk factors that affect the population of Martinique; - The nutritional status of the population and food intake in relation to potential risk factors; - Population habits in terms of food choices and frequency of consumption; - the population's habitual access to food.
----------------	--

Inclusion criteria	- 3 years and over - living in Martinique for 12 months preceding the survey and at the time of the survey
--------------------	--

Population type

Age	Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
-----	---

Population covered	General population
--------------------	--------------------

Gender	Male Woman
--------	---------------

Geography area	Regional
----------------	----------

French regions covered by the database	Martinique
--	------------

Detail of the geography area	Martinique
------------------------------	------------

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	11/2003
--	---------

Date of last collection (YYYY or MM/YYYY)	02/2004
---	---------

Size of the database

Size of the database (number of individuals)	[1000-10 000[individuals
--	---------------------------

Details of the number of	2114
--------------------------	------

individuals	
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Medical registration
Declarative data (detail)	Face to face interview
Presence of a biobank	No
Health parameters studied	Quality of life/health perception Others
Other (detail)	Dietary habits
Procedures	
Participant monitoring	No
Links to administrative sources	No
Promotion and access
