

HEPATYS - Cohort study on management and outcome of patients with chronic Hepatitis C treated with PEG-IFN-alpha2a in combinaison with ribavirin in hospital-based or private office-based

Head :Pinta Alexandrina, ROCHE

Last update : 09/05/2017 | Version : 2 | ID : 177

General

Identification

Detailed name	Cohort study on management and outcome of patients with chronic Hepatitis C treated with PEG-IFN-alpha2a in combinaison with ribavirin in hospital-based or private office-based
---------------	--

Sign or acronym	HEPATYS
-----------------	---------

General Aspects

Medical area	Gastroenterology et hepatology
--------------	--------------------------------

Keywords	chronic hepatitis C, Pegasys
----------	------------------------------

Scientific investigator(s) (Contact)

Name of the director	Pinta
Surname	Alexandrina
Phone	+33 (0)1 46 40 43 76
Email	alexandrina.pinta@roche.com
Unit	ROCHE

Collaborations

Funding

Funding status	Private
----------------	---------

Details	Roche

Organisation status	Private
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Longitudinal study (except cohorts)
Database recruitment is carried out by an intermediary	A selection of health care professionals A selection of health institutions and services
Database recruitment is made on the basis of:	Medication(s) taken
Database recruitment is carried out as part of an interventional study	No
Database objective	
Main objective	Describe the management and outcome of patients with chronic Hepatitis C treated with PEG-IFN-alpha2a in combination with ribavirin in hospital-based or private office-based
Inclusion criteria	Patients suffering from chronic hepatitis C for whom a treatment via Pagasys was decided and then initiated, followed in a hospital and general environment Patients who have been informed of the study orally and in writing
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years)
Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY) 2003

Date of last collection (YYYY or MM/YYYY) 2006

Size of the database

Size of the database (number of individuals) [1000-10 000[individuals

Details of the number of individuals 2155

Data

Database activity Data collection completed

Type of data collected Clinical data
Biological data

Clinical data (detail) Direct physical measures

Biological data (detail) HCV viral load, Hb, Platelets, Leukocytes, creatinine

Presence of a biobank No

Health parameters studied Health event/morbidity
Health event/mortality
Health care consumption and services
Quality of life/health perception

Care consumption (detail) Hospitalization
Medical/paramedical consultation
Medicines consumption

Procedures

Participant monitoring Yes

Links to administrative sources No

Promotion and access
