

# R-ens 2012 - Cross-sectional study on care patterns before a first consultation for psoriasis

Head :Mahé Emmanuel, Service de dermatologie

Last update : 06/26/2014 | Version : 1 | ID : 8988

## General

### Identification

Detailed name Cross-sectional study on care patterns before a first consultation for psoriasis

Sign or acronym R-ens 2012

### General Aspects

Medical area General practice

Keywords Severity, misdiagnosis., care, diagnosis, error

### Scientific investigator(s) (Contact)

Name of the director Mahé

Surname Emmanuel

Address 69 Rue du Lieutenant Colonel Prudhon, 95107 Argenteuil

Email emmanuel.mahe@ch-argenteuil.fr

Unit Service de dermatologie

Organization Centre Hospitalier Victor Dupouy

### Collaborations

### Funding

Funding status Public

Details CHU

### Governance of the database

Sponsor(s) or organisation(s) responsible Centre Hospitalier Argenteuil

Organisation status Public

## Additional contact

## Main features

### Type of database

Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Any adult consulting for the first time for psoriasis in one of the 35 participating centers was included in the study.

### Database objective

Main objective	Little information is available on care patterns of psoriasis patients before their first consultation for psoriasis. A feeling often transmitted is that patients "wander" before their first consultation for psoriasis. The objective of this study is to gather and analyze data on care patterns for patients affected by psoriasis before a first consultation for psoriasis in dermatology.
----------------	---

Inclusion criteria	- age equal or superior to 18
--------------------	-------------------------------

### Population type

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years)
-----	--

Population covered	Sick population
--------------------	-----------------

Gender	Male Woman
--------	---------------

Geography area	National
----------------	----------

Detail of the geography area	France : Argenteuil, Saint-Mandé, Boulogne-Billancourt, Orléans, Reims, Clamart, Marseille,
------------------------------	---

Angers, Toulon, Lyon, Le Havre, Dijon, Joinville-le-Pont, Mantes-La-Jolie, Brunoy, Saint-Germain en Laye.

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY) 01/2012

Date of last collection (YYYY or MM/YYYY) 05/2012

### Size of the database

Size of the database (number of individuals) [500-1000[ individuals

Details of the number of individuals 751

### Data

Database activity Data collection completed

Type of data collected Clinical data  
Declarative data

Clinical data (detail) Direct physical measures  
Medical registration

Details of collected clinical data Clinical characteristics of psoriasis

Declarative data (detail) Face to face interview

Details of collected declarative data Clinical characteristics of psoriasis

Presence of a biobank No

Health parameters studied Health event/morbidity  
Health care consumption and services

Care consumption (detail) Hospitalization  
Medical/paramedical consultation  
Medicines consumption

### Procedures

Participant monitoring No

Links to administrative sources      No

## Promotion and access

### Promotion

### Access

Terms of data access (charter for data provision, format of data, availability delay)

Via publications. For more information, contact the scientific investigator.

Access to aggregated data

Access on specific project only
