Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Longitudinal study (except cohorts)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is made on the basis of:	Medication(s) taken
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Random selection of 30 gastroenterologists from a list of French gastroenterologists who follow and treat patients for their Crohn's disease
Database objective	
Main objective	Validate a new satisfaction questionnaire for patients with regards to their treatment with Anti TNF in Crohn's disease at a severe and evolving stage
Inclusion criteria	Patients suffering from severe and evolving Crohn's disease and who have not responded to the treatments despite a complete and adapted protocol of corticotherapy and/or an immunosuppressant or intolerant to such treatments or that have medical contraindications and who move to an anti TNF treatment
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	Sick population
Gender	Male

Woman

Geography area                      National

Detail of the geography area        National

## Data collection

### Dates

Date of first collection (YYYY or  
MM/YYYY)                      2010

Date of last collection (YYYY or  
MM/YYYY)                      2011

### Size of the database

Size of the database (number of  
individuals)                      < 500 individuals

Details of the number of  
individuals                      300

### Data

Database activity                      Current data collection

Type of data collected                Clinical data  
Declarative data

Clinical data (detail)                Direct physical measures

Declarative data (detail)            Paper self-questionnaire

Presence of a biobank                No

Health parameters studied          Others

Other (detail)                      Satisfaction questionnaire

### Procedures

Classifications used                CIM 10

Participant monitoring                Yes

Details on monitoring of  
participants                      3 months of follow-up starting from patient  
inclusion

Links to administrative sources    No
