APICALE-AJI - Auvergne-Loire observatory on chronic inflammatory diseases of the musculoskeletal system occurring in childhood - Arthrites Juvéniles Idiopathiques cohort (longterm follow-up of children with juvenile idiopathic arthritis)

Head: Merlin Etienne, Inserm CIC 501

Name of the director

Chausset Aurélie, Centre de Recherche Clinique chez l'Enfant - Inserm CIC 1405 CRCTCP, CHU ESTAING

Last update : 08/06/2014 Version : 1 ID : 5222		
General		
Identification		
Detailed name	Auvergne-Loire observatory on chronic inflammatory diseases of the musculoskeletal system occurring in childhood - Arthrites Juvéniles Idiopathiques cohort (long-term follow-up of children with juvenile idiopathic arthritis)	
Sign or acronym	APICALE-AJI	
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL en cours	
General Aspects		
Medical area	Rheumatology	
Health determinants	Climate	
Others (details)	Juvenile Idiopathic Arthritis	
Keywords	Very long-term progression of children with Juvenile Idiopathic Arthritis (AJI), transition period, joint disease, repercussions	
Scientific investigator(s) (Contact)		

ivaline of the director	Pichini
Surname	Etienne
Address	Service de pédiatrie CHU Estaing 1 place Lucie Aubrac 63003 Clermont-Ferrand
Phone	+ 33 (0)4 73 75 00 15

Study databases

Type of database

Study databases (details)	Longitudinal study (except cohorts)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Database objective	
Main objective	The primary objective of this project is to describe the very long-term progression of Juvenile Idiopathic Arthritis (AJI) in children, from onset of the disease until adulthood that extends past the transition period. The follow-up will particular focus on joint disease activity as well as very long-term repercussions The secondary objectives will be to provide data relating to treatment effectiveness and tolerance, especially concerning the outcome for children intolerant to methotrexate and the monitoring children in biotherapy This follow-up will also aid articulation between research and practice by proposing further studies in 3 areas: o nursing research and therapeutic education o study of bone microarchitecture o study of endothelial function and vascular abnormalities
Inclusion criteria	Children with Juvenile Idiopathic Arthritis (AJI) from the Auvergne-Loire region
Population type	
Age	Early childhood (2 to 5 years) Childhood (6 to 13 years) Adolescence (13 to 18 years)
Population covered	Sick population
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Auvergne Rhône-Alpes
Detail of the geography area	Auvergne-Loire
Data collection	
Dates	

Date of first of	collection	(YYYY)	or
MM/YYYY)			

Size of the database	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	165 (08/2014)
Data	
Database activity	Current data collection
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures
Declarative data (detail)	Paper self-questionnaire
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality Health care consumption and services
Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption
Procedures	
Data collection method	Follow-up log. Patient data will be sent by post to the coordinating centre (CHU de Clermont-Ferrand). Data input will be carried our annually Access designed for this purpose
Participant monitoring	Yes
Details on monitoring of participants	Follow-up will be for as long as possible with no definite duration. Follow-up initiated during childhood will continue to adulthood.
Links to administrative sources	No
Promotion and access	
Promotion
