Identification

Detailed name Vascular Ageing, Decline in Brain and Cognitive

Functions

Sign or acronym EVA

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation CNIL n°252346

General Aspects

Medical area Cardiology

Neurology

Health determinants Social and psychosocial factors

Keywords decline, brain function, cognitive function, Health

episodes

Scientific investigator(s) (Contact)

Name of the director Berr

Surname Claudine

Address 34093 MONTPELLIER

Phone +33 (0)4 99 61 45 66

| Main features | |
| Type of database | |
| Type of database | Study databases |
| Study databases (details) | Cohort study |
| Database recruitment is carried out by an intermediary | A selection of health institutions and services |
| Database recruitment is carried out as part of an interventional study | No |
| Additional information regarding sample selection. | Prospective Other bodies active in creating this cohort: INSERM, City of NANTES, Faculty of Medicine and Biochemical and Radiological services in Nantes. Inclusion cut-off date: 01/07/1993 |
| Database objective | |
| Main objective | General objective: to investigate vascular ageing, decline in brain and cognitive function and associated factors with a longitudinal follow-up study. Secondary objective: to the determine to role of biological factors linked with oxidative stress and brain ageing. |
| Inclusion criteria | Subjects from both genders born between 1922 and 1932 (59 to 71 years old at enrolment), included in electoral registers in Nantes, can speak French and living in Nantes. |
| Population type | |
| Age | Adulthood (45 to 64 years) Elderly (65 to 79 years) |

| Population covered | General population |
|--|--|
| Gender | Male Woman |
| Geography area | Local |
| French regions covered by the database | Pays de la Loire |
| Detail of the geography area | Nantes |
| Data collection | |
| Dates | |
| Date of first collection (YYYY or MM/YYYY) | 07/1991 |
| Date of last collection (YYYY or MM/YYYY) | 12/2001 |
| Size of the database | |
| Size of the database (number of individuals) | [1000-10 000[individuals |
| Details of the number of individuals | 1389 |
| Data | |
| Database activity | Data collection completed |
| Type of data collected | Clinical data Declarative data Paraclinical data Biological data |
| Clinical data (detail) | Direct physical measures Medical registration |
| Declarative data (detail) | Paper self-questionnaire Face to face interview |
| Paraclinical data (detail) | Imaging: carotid ultrasound, transcranial Doppler (at 0, 2 and 4 years), head MRI (4 years). |
| Biological data (detail) | Type of samples taken: biochemical routine assessment (enrolment, 2,4 and 9 years); dosage of different actors of oxidative stress (SE, betacarotene, vitamin E, GSH-Px, SOD) (enrolment |

| | and/or at 2 years + partial assessment at 9 years); cell haematological and coagulation assessment, as well as connective tissue markers (enrolment). Determination of fatty acids in red blood cells in 346 subjects (4 years). |
|--|--|
| Presence of a biobank | Yes |
| Contents of biobank | Serum DNA |
| Details of biobank content | Serum bank, DNA bank |
| Health parameters studied | Health event/morbidity Health event/mortality |
| Procedures | |
| Data collection method | Self-administered questionnaire: double data entry from a paper questionnaire Interview: double data entry from a paper questionnaire Clinical Examinations: manual input Biological analysis: direct input |
| Participant monitoring | Yes |
| Details on monitoring of participants | Follow-up duration: 9 years |
