

ARDCO - Cohort on Screening Programme for Asbestos-Related Diseases

Head :Pairot Jean-Claude, INSERM UNITÉ 955 - GEIC20 INSERM

Last update : 10/29/2020 | Version : 5 | ID : 60027

General

Identification

| | |
|--|---|
| Detailed name | Cohort on Screening Programme for Asbestos-Related Diseases |
| Sign or acronym | ARDCO |
| CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation | CNIL 908001 (16/04/08), amendement 10/09/10, 22/05/2015, 17/06/2016, 05/07/2017 ; CPP 1946 (11/02/02) |

General Aspects

| | |
|---------------------|---|
| Medical area | Cancer research Occupational Medicine |
| Health determinants | Occupation |
| Keywords | long-duration disease (LDD), pleural plaques, asbestosis, medical usage, chest CT scan, anxiety, lung cancer, mesothelioma, colon cancer, Health episodes, treatment, mortality, asbestos |

Scientific investigator(s) (Contact)

| | |
|----------------------|--|
| Name of the director | Pairot |
| Surname | Jean-Claude |
| Address | 94010 CRÉTEIL |
| Phone | + 33 (0)1 57 02 20 90 |
| Email | jc.pairot@chicreteil.fr |
| Unit | INSERM UNITÉ 955 - GEIC20 INSERM |
| Organization | INSTITUT INTER-UNIVERSITAIRE DE MEDECINE DU TRAVAIL DE PARIS ILE DE FRANCE |

Main features

Type of database

Type of database Study databases

Study databases (details) Cohort study

Database recruitment is carried out by an intermediary A population file

Database recruitment is carried out as part of an interventional study No

Additional information regarding sample selection. Prospective Other bodies active in creating this cohort: CPAM, IIMTPIF, INSERM, University (Bordeaux), Social Security (ERSM RHONE ALPES) Inclusion cut-off date: 01/12/2005

Database objective

Main objective 1 - To evaluate the incidence of cancer mortality (including lung and pleura cancers) in the ARDCO cohort based on work calendar and benign asbestos-related diseases (asbestosis, pleural plaques). 2 - Evaluation of the contribution of CT examinations, thoughts on examination periodicity. 3 - To assess the psychological impact of post-

occupational medical surveillance of individuals exposed to asbestos 4 - To evaluate the role of co-exposures to other carcinogens with asbestos pollution in the risk of developing cancer 5 - To contribute to defining the populations at risk of lung cancer 6 - To contribute defining optimal methods for monitoring populations previously exposed to asbestos

| | |
|--|--|
| Inclusion criteria | Subjects affiliated with a general social security scheme, retired (or a few inactive subjects), exposed to asbestos professionally, with different age limits according to all 4 regions. |
| Population type | |
| Age | Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more) |
| Population covered | General population |
| Pathology | |
| Gender | Male Woman |
| Geography area | Local |
| French regions covered by the database | Aquitaine Limousin Poitou-Charentes Auvergne Rhône-Alpes Normandie |
| Detail of the geography area | Multicentric cohort throughout France (4 regions): Aquitaine, Rhône-Alpes, Upper and Lower Normandy |
| Data collection | |
| Dates | |
| Date of first collection (YYYY or MM/YYYY) | 10/2002 |
| Date of last collection (YYYY or MM/YYYY) | 2021 |
| Size of the database | |
| Size of the database (number of individuals) | [10 000-20 000[individuals |
| Details of the number of | 16000 |

Data

| | |
|----------------------------|--|
| Database activity | Current data collection |
| Type of data collected | Clinical data Declarative data Paraclinical data |
| Clinical data (detail) | Direct physical measures Medical registration |
| Declarative data (detail) | Paper self-questionnaire |
| Paraclinical data (detail) | Imaging (chest CT)2002-2005- lung function test by a pulmonologist (initial assessment) for 5825 patients, then chest CT for 2350 patients in 2011-2012 and chest CT for 1339 patients in in 2018-2019 |
| Presence of a biobank | No |
| Health parameters studied | Health event/morbidity Health event/mortality Health care consumption and services |
| Care consumption (detail) | Hospitalization |

Procedures

| | |
|--|---|
| Data collection method | Self-administered questionnaire: input from a paper questionnaire or optical input (Daptascan) - Clinical examination data collected by treating physician at baseline: input from a paper questionnaire - chest CT: optical reading from a standardised review scale |
| Participant monitoring | Yes |
| Monitoring procedures | Monitoring by contact with the participant (mail, e-mail, telephone etc.) |
| Details on monitoring of participants | Since 2002. Programm in progress in 2020 |
| Links to administrative sources | Yes |
| Linked administrative sources (detail) | CépiDC, Health insurance databases, Cancer registries for départements involved |
