

PASS-ARTHROSE - Patient Acceptable Symptomatic State

Head :VIGNAL Franck, Sanofi Aventis

Last update : 01/01/2020 | Version : 1 | ID : 93

General	
Identification	
Detailed name	Patient Acceptable Symptomatic State
Sign or acronym	PASS-ARTHROSE
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	Numéro CNIL 909039, Numéro CPP = NA, Afssaps = NA
General Aspects	
Medical area	General practice Rheumatology
Others (details)	Arthrosis of the lower limbs
Keywords	evaluation of the pain and response to antalgic treatment, PASS, Minimal Clinically Important Improvement (MCII)
Scientific investigator(s) (Contact)	
Name of the director	VIGNAL
Surname	Franck
Phone	+33 (0)1 57 63 26 47
Email	franck.vignal@sanofi-aventis.com
Unit	Sanofi Aventis
Collaborations	
Funding	
Funding status	Private
Details	Sanofi-aventis France

Governance of the database	
Sponsor(s) or organisation(s) responsible	Sanofi-aventis France
Organisation status	Private
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health care professionals An administrative base or a register
Database recruitment is carried out as part of an interventional study	No
Database objective	
Main objective	Determine, in patients suffering from arthrosis of the lower limbs, the percentage of patients that find their pain "acceptable" at rest and when movement, after one week of treatment, according to the PASS concept (Patient Acceptable Symptomatic State).
Inclusion criteria	Patients must: <ul style="list-style-type: none"> ? be ambulatory, ? be aged 50 years or older, ? consult for a defined gonarthrosis and/or coxarthrosis according to the clinical or radiological criteria of the American College of Rheumatology, ? be symptomatic with pain greater or equal to 3 on a numerical pain scale from 0 to 10, at rest or during movement, in the 24 hours preceding entry in the study, ? requiring the taking of an antalgic treatment for a duration of at least one week, ? be able and accept to complete a self-evaluation questionnaire, ? accepting to participate in the survey.
Population type	
Age	Adulthood (45 to 64 years) Elderly (65 to 79 years)

Great age (80 years and more)

Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	French territory (France+overseas possessions)
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2009
Date of last collection (YYYY or MM/YYYY)	2010
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	3329
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data Administrative data
Clinical data (detail)	Medical registration
Declarative data (detail)	Paper self-questionnaire
Administrative data (detail)	? age, sex, ? weight, height, ? social and occupational category (INSEE classification),
Presence of a biobank	No
Health parameters studied	Health care consumption and services Quality of life/health perception
Care consumption (detail)	Medicines consumption
Procedures	

Data collection method	general practice, evaluation of the pain and response to antalgic treatment, arthrosis of the lower limbs Doctor's questionnaire patient self-questionnaire
Participant monitoring	No
Links to administrative sources	No
Promotion and access	
Promotion	
Access	
Terms of data access (charter for data provision, format of data, availability delay)	methods for accessing the database are currently being defined SFR 2010 poster. Publication scheduled in 2011.
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
