Main features

Type of database

Type of database	Study databases
Study databases (details)	Repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A population file
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Random two-stage sampling: the household is selected and then the individual according to the birthday method. An announcement letter is sent before the call

(when the address is available).
Persons registered in the red list, those who can be contacted only via a mobile telephone and those with a fully unbundled number beginning with 08/09 (contacted through their mobile telephone) participated in the survey.
Distribution of the calls in 2010:
- Landline: 84 %
- Mobile exclusively: 11 %
- Unbundled 08/09: 5 %

Database objective

Main objective Evaluate the behaviors, screening practices, representations on the care, attitudes and knowledge of individuals residing in France in terms of cancer.

Inclusion criteria Querying people in households:
- equipped with a landline (white, orange or red list) with geographical number (01 to 05)
- equipped solely with a mobile telephone
- equipped with a mobile telephone and a fully unbundled landline with a number starting with 08 or 09

Population type

Age Adolescence (13 to 18 years)
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered General population

Gender Male
Woman

Geography area National

Detail of the geography area Metropolitan France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY) 2005

Date of last collection (YYYY or MM/YYYY) 2010

Size of the database

Size of the database (number of individuals) [1000-10 000[individuals

Details of the number of individuals 4 046 in 2005 3 727 in 2010

Data

Database activity Data collection completed

Type of data collected Declarative data

Declarative data (detail) Phone interview

Presence of a biobank No

Health parameters studied Health event/morbidity
Health care consumption and services
Quality of life/health perception

Care consumption (detail) Hospitalization
Medical/paramedical consultation

Procedures

Participant monitoring No

Links to administrative sources No
