

IMPACT - Determinants of the non-control of blood pressure in overweighted treated hypertensive patients

Head :Vignal Franck, Sanofi Aventis

Last update : 01/01/2019 | Version : 1 | ID : 87

General

Identification

Detailed name Determinants of the non-control of blood pressure in overweighted treated hypertensive patients

Sign or acronym IMPACT

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation accord cadre CNIL 1250160

General Aspects

Medical area Cardiology

Others (details) overweight and high blood pressure

Scientific investigator(s) (Contact)

Name of the director Vignal

Main features

Type of database

Type of database

Study databases

Study databases (details)

Not-repeated cross-sectional studies (except case control studies)

Database recruitment is carried out by an intermediary

A selection of health care professionals
A selection of health institutions and services

Database recruitment is carried out as part of an interventional study

No

Additional information regarding sample selection.

first 3 consecutive patients meeting the selection criteria for general practitioners and the 6 first consecutive patients meeting the selection criteria for cardiologists, according to the following ratios:
- 1 treated obese or overweight hypertensive patient by GPs, 3 by cardiologists,
- 1 treated normal weight hypertensive patient by GPs, 3 by cardiologists,
- for GPs, the 3rd patient recruited can be obese, overweight or of normal weight.

Database objective

Main objective

Find the determinants of the non-control of blood pressure in treated hypertensive patients who are overweight or obese compared to treated hypertensive patients of normal weight

Inclusion criteria

Man or woman, over the age of 18 years, Having essential high blood pressure (HBP) treated for at least 1 year, Having a BMI < 25 kg/m² for patients of normal weight, Having a BMI ≥ 25 kg/m² for overweight or obese patients

Population type

Age

Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2008
Date of last collection (YYYY or MM/YYYY)	2009
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	3750
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures
Declarative data (detail)	Paper self-questionnaire
Presence of a biobank	No
Health parameters studied	Health event/morbidity
Procedures	
Data collection method	Filling out the data collection sheet by the participating observing doctors
Participant monitoring	No
Links to administrative sources	No

Promotion and access

Promotion

Access

Terms of data access (charter for data provision, format of data, availability delay)

methods for accessing the database are currently being defined

Access to aggregated data
