

MEVE - Menopause Estrogen Venous Events

Head :Scarabin Pierre-Yves, INSERM U1018 CENTRE DE RECHERCHE EN ÉPIDÉMIOLOGIE ET SANTÉ DES POPULATIONS

Last update : 08/12/2014 | Version : 2 | ID : 60065

General	
Identification	
Detailed name	Menopause Estrogen Venous Events
Sign or acronym	MEVE
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	--
General Aspects	
Medical area	Biology Cardiology
Health determinants	Addictions Genetic Intoxication Social and psychosocial factors
Keywords	serious illness, HRT, Health episodes
Scientific investigator(s) (Contact)	
Name of the director	Scarabin
Surname	Pierre-Yves
Phone	+ 33 (0)1 45 59 51 14
Email	pierre-yves.scarabin@inserm.fr
Unit	INSERM U1018 CENTRE DE RECHERCHE EN ÉPIDÉMIOLOGIE ET SANTÉ DES POPULATIONS
Organization	INSERM - Institut National de la Santé et de la Recherche
Collaborations	

Funding	
Funding status	Mixed
Details	INSERM, Pierre Fabre Santé
Governance of the database	
Sponsor(s) or organisation(s) responsible	INSERM - Institut National de la Santé et de la Recherche Médicale
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is is made on the basis of:	Medication(s) taken
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Prospective Other bodies active in creating this cohort: PIERRE-YVES SCARABIN; GENEVIEVE PLU BUREAU; JACQUELINE CONARD; MARIE-HELENE HORELLOU.
Database objective	
Main objective	To investigate the impact of transdermal oestrogens and other menopause treatments on the risk of recurrent venous thrombosis.
Inclusion criteria	Menopausal women aged between 45 and 70 years old attending Hôtel-Dieu Hospital for the first documented instance of a venous thrombotic event (Doppler ultrasound, angiography scan, angiogram etc.) and/or thrombophilia (factor V Leiden, 20210a mutation, ATIII deficiency, PC, PS).
Population type	

Age	Adulthood (45 to 64 years) Elderly (65 to 79 years)
Population covered	Sick population
Gender	Woman
Geography area	Local
French regions covered by the database	Île-de-France
Detail of the geography area	Paris and surrounding region
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	01/2000
Date of last collection (YYYY or MM/YYYY)	01/2010
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	1023
Data	
Database activity	Current data collection
Type of data collected	Clinical data Declarative data Paraclinical data Biological data
Clinical data (detail)	Direct physical measures Medical registration
Declarative data (detail)	Paper self-questionnaire Face to face interview
Paraclinical data (detail)	Imaging
Biological data (detail)	Type of samples taken: Systematic thrombophilia research as part of a specialist consultation.

Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality Health care consumption and services
Care consumption (detail)	Medicines consumption
Procedures	
Data collection method	Self-administered questionnaire: double data entry from a paper questionnaire Interview: double data entry from a paper questionnaire Clinical Examinations: handwritten with double data entry
Participant monitoring	Yes
Links to administrative sources	No
Promotion and access	
Promotion	
Link to the document	http://www.ncbi.nlm.nih.gov/pubmed/?term=%28Scarabin+PY[Author]+AND+MEVE%29+OR+21178641[uid]
Description	List of publications in Pubmed
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Data may be used by academic teams Data may be used by industrial teams
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
