

# POSTEPI - Management of osteoporosis and associated quality of life in post menopausal women

Head :Leclerc-Zwirn Christel, Laboratoire GSK

Last update : 01/01/2018 | Version : 1 | ID : 159

## General

### Identification

Detailed name Management of osteoporosis and associated quality of life in post menopausal women

Sign or acronym POSTEPI

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation

--

### General Aspects

Medical area General practice  
Rheumatology

Health determinants Iatrogenic

Others (details) Osteoporosis

Keywords observation, fracture, observance

### Scientific investigator(s) (Contact)

Name of the director Leclerc-Zwirn

Surname Christel

Phone +33 (0)1 39 17 86 96

Email christel.C.leclerc-zwirn@gsk.com

Unit Laboratoire GSK

### Collaborations

### Funding

Funding status Private

Details	GSK laboratory
<b>Governance of the database</b>	
Sponsor(s) or organisation(s) responsible	LABORATOIRE GSK
Organisation status	Private
<b>Additional contact</b>	
<b>Main features</b>	
<b>Type of database</b>	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health care professionals A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	The list of general practitioners, rheumatologists and gynecologists who can participate in the study was established via a random drawing stratified by regions in order to ensure national representativeness of the doctors. A selection process in several waves was set up in order to obtain the required number of doctors. Throughout the entire study, the doctor completed, for all of the patients seen in consultation and having the criteria for participating in the registry, a medical questionnaire
<b>Database objective</b>	
Main objective	In the framework of the new screening and reimbursement conditions for osteoporosis medications, describe the profile of postmenopausal women with osteoporosis and treated for less than 6 months
Inclusion criteria	Postmenopausal women diagnosed with osteoporosis less than 6 months ago via low BMD (Femoral total T score and/or spinal average <-2.5) or on a fracture not linked to a major trauma or to a cancer and treated for less than 6 months

## Population type

Age  
Adulthood (45 to 64 years)  
Elderly (65 to 79 years)  
Great age (80 years and more)

Population covered  
Sick population

Gender  
Woman

Geography area  
National

Detail of the geography area  
France

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY)  
2007

Date of last collection (YYYY or MM/YYYY)  
2008

### Size of the database

Size of the database (number of individuals)  
[1000-10 000[ individuals

Details of the number of individuals  
1306

## Data

Database activity  
Data collection completed

Type of data collected  
Clinical data  
Declarative data

Clinical data (detail)  
Direct physical measures  
Medical registration

Declarative data (detail)  
Paper self-questionnaire

Presence of a biobank  
No

Health parameters studied  
Quality of life/health perception  
Others

Other (detail)  
observance (MMAS)

## Procedures

Data collection method	Registry, medical questionnaire and patient self-questionnaire
Participant monitoring	No
Links to administrative sources	No
<b>Promotion and access</b>	
<b>Promotion</b>	
<b>Access</b>	
Terms of data access (charter for data provision, format of data, availability delay)	Publications: Cortet et al. Musculoskeletal Disorder. 2011 / Huas et al. Women's Health. 2010
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
