

E4N - Epidemiological Study Concerning The Children of E3N Women

Head :Severi Gianluca, Inserm - CESP, Team "Health across Generations"

Last update : 12/21/2020 | Version : 6 | ID : 3101

General

Identification

Detailed name Epidemiological Study Concerning The Children of E3N Women

Sign or acronym E4N

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation Inserm ethical evaluation comitee (IRB00003888) - For the 4N-G1 cohort : CNIL authorization DR-2014-224. For the E4N-G2 cohort : CNIL authorization DR-2017-049

General Aspects

Medical area

- Biology
- Cancer research
- Cardiology
- Dermatology, venereology
- Disability/handicap
- Endocrinology and metabolism
- Gastroenterology et hepatology
- Geriatrics
- Gynecology/ obstetrics
- Hematology
- Neurology
- Pediatrics
- Pneumology
- Psychology and psychiatry
- Radiology and medical imaging
- Rheumatology
- Study of allergies
- Traumatology
- Urology, andrology and nephrology

Study in connection with Covid-19 Yes

Health determinants

- Genetic
- Geography
- Iatrogenic
- Lifestyle and behavior
- Nutrition
- Occupation

Pollution
Social and psychosocial factors

Keywords family environment, Lifestyle and behaviour, family members, family determinants

Main features

Type of database

Type of database Study databases

Study databases (details) Cohort study

Database recruitment is carried out by an intermediary A population file

Database recruitment is carried out as part of an interventional study No

Additional information regarding sample selection. Family cohort : include the members of the E3N women's family on 3 generations :
- E3N women and their children's fathers (E4N-G1)
- E3N women's children (E4N-G2)
- E3N women's grandchildren (E4N-G3)

Database objective

Main objective The familial E3N-E4N study purpose is to study health in relation to the modern way of life in people of the same family over three generations.

The E4N study aims to extend the E3N study by following the descendants of women who participated in the E3N study. The objective is to better understand the onset of major diseases, from genetics, family environment and the environment outside the family.

As well as gathering a large amount of prospective epidemiological data, E4N cohort permit the collection of important information concerning phenotypes and genetics.

Inclusion criteria Women included in the E3N cohort (G1),
Fathers of E3N women's children (G1)
Sons and daughters of E3N women (G2),
Grandchildren of E3N women (G3).

Population type

Age Adulthood (19 to 24 years)
Adulthood (25 to 44 years)

Details of collected declarative data	Lifestyle and state of health
Biological data (detail)	Saliva samples (DNA extraction)
Administrative data (detail)	Identification data
Presence of a biobank	Yes
Contents of biobank	Fluids (saliva, urine, amniotic fluid, ?) DNA
Health parameters studied	Health event/morbidity Health event/mortality Health care consumption and services Quality of life/health perception
Care consumption (detail)	Hospitalization Medicines consumption
Procedures	
Data collection method	For G1: paper self-questionnaires ; For G2 and G3: webquestionnaires, sms, trackers of physical activity; For all: contacts with doctors + matching with the medico-administrative databases of Health Insurance and CNAV
Classifications used	CIM 10
Participant monitoring	Yes
Monitoring procedures	Monitoring by contact with the participant (mail, e-mail, telephone etc.) Monitoring by contact with the referring doctor Monitoring by crossing with a medical-administrative database Monitoring by crossing with a morbidity register
Details on monitoring of participants	Data collection will take several years and the duration of the study is not limited in time.
Followed pathology	II - Neoplasms
	IV - Endocrine, nutritional and metabolic diseases
	V - Mental and behavioural disorders
	XI - Diseases of the digestive system
	I10-I15 - Hypertensive diseases

E11 - Type 2 diabetes mellitus

G20 - Parkinson disease

I20-I25 - Ischaemic heart diseases

Links to administrative sources Yes

Linked administrative sources (detail) CepiDc, SNIIR-AM, CNAV

Promotion and access

Promotion

Access

Dedicated website [website of the E4N study](#)

Presence of document that lists variables and coding procedures Yes

Terms of data access (charter for data provision, format of data, availability delay) External team access: submission of access request to the Scientific Committee of the E4N Study

Access to aggregated data Access on specific project only

Access to individual data No access
