

GN-PROGRESS - Study of Genetic and Environmental Factors of Glomerular Nephropathy Progression

Head :Stengel Bénédicte, INSERM U1018 CENTRE DE RECHERCHE EN ÉPIDÉMIOLOGIE ET SANTÉ DES POPULATIONS
Rossert , U780

Last update : 09/05/2017 | Version : 2 | ID : 60055

General	
Identification	
Detailed name	Study of Genetic and Environmental Factors of Glomerular Nephropathy Progression
Sign or acronym	GN-PROGRESS
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	Cpp (p001104), CNIL (n°901267, 04/03/2005)
General Aspects	
Medical area	Urology, andrology and nephrology
Health determinants	Climate Genetic Geography Pollution
Keywords	Health episodes, renal transplantation
Scientific investigator(s) (Contact)	
Name of the director	Stengel
Surname	Bénédicte
Phone	+ 33 (0)1 45 59 50 39
Email	benedicte.stengel@inserm.fr
Unit	INSERM U1018 CENTRE DE RECHERCHE EN ÉPIDÉMIOLOGIE ET SANTÉ DES POPULATIONS
Organization	INSERM
Name of the director	Rossert

Unit	U780
Organization	INSERM
Collaborations	
Participation in projects, networks and consortia	Yes
Funding	
Funding status	Public
Details	INSERM, ministère de la recherche, ministère de l'environnement, PHRC
Governance of the database	
Sponsor(s) or organisation(s) responsible	AP-HP
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Retropective Inclusion cut-off date: 01/01/2004
Database objective	
Main objective	To investigate genetic and environmental factors of glomerular nephropathy progression.
Inclusion criteria	IgA-type glomerulonephritis, focal and segmental hyalinosis or extramembranous glomerulopathy, having had a biopsy between 1994 and 2001

Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	Sick population
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Île-de-France
Detail of the geography area	Multicentric cohort throughout Paris region (12 centres)
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	01/2002
Date of last collection (YYYY or MM/YYYY)	05/2004
Size of the database	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	356
Data	
Database activity	Data collection completed
Type of data collected	Declarative data Biological data
Declarative data (detail)	Face to face interview
Biological data (detail)	Type of samples taken: Blood, urine
Presence of a biobank	Yes
Contents of biobank	Serum DNA

Details of biobank content	Serum bank, DNA bank
Health parameters studied	Health event/morbidity Health event/mortality
Procedures	
Data collection method	Interview: from paper questionnaire (manual input) and double data entry
Participant monitoring	Yes
Links to administrative sources	Yes
Linked administrative sources (detail)	Database used: crystallographic database for people who have had a renal transplant
Promotion and access	
Promotion

Link to the document	http://www.hal.inserm.fr/GN-PROGRESS
Description	List of publications in HAL
Link to the document	http://www.ncbi.nlm.nih.gov/pubmed/?term=GN-PROGRESS+OR+23431073[uid]+OR+22737082[uid]+OR+21323541[uid]+OR+17567724[uid]
Description	List of publications in Pubmed
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Data may not be used by academic teams Data may not be used by industrial teams
Access to aggregated data	Access on specific project only
Access to individual data	No access
