Population type

Age Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)

Population covered General population

Gender Male
Woman

Geography area National

Detail of the geography area France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY) 1998

Size of the database

Size of the database (number of individuals) [500-1000[individuals

Details of the number of individuals 781 sujets - 224 cas parkinsoniens/cases - 557 témoins/controls

Data

Database activity Data collection completed

Type of data collected Clinical data
Declarative data

Clinical data (detail) Medical registration

Declarative data (detail) Face to face interview

Presence of a biobank Yes

Contents of biobank DNA

Details of biobank content Buccal cells

Health parameters studied Health event/morbidity

Procedures

Data collection method -----

Participant monitoring Yes

Links to administrative sources No
