

GYNEQOL - COHORT ON HEALTH-RELATED QUALITY OF LIFE IN GYNAECHOLOGIC ONCOLOGY

Head :Ramanah Rajeev, Pôle mère-enfant / Physiologie Cardiovasculaire (EA 3920)

Paget-Bailly Sophie, Unité Méthodologique et de Qualité de Vie en Cancérologie (EA 3181)

Kalbacher Elsa, Service d'oncologie médicale

Coutant Charles

Dabakuyo Sandrine

Last update : 08/19/2014 | Version : 1 | ID : 8137

General

Identification

Detailed name COHORT ON HEALTH-RELATED QUALITY OF LIFE IN GYNAECHOLOGIC ONCOLOGY

Sign or acronym GYNEQOL

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation Accord CNIL

General Aspects

Medical area Cancer research

Health determinants Genetic
Geography
Social and psychosocial factors

Others (details) Gynaecologic cancers

Keywords Endometrial cancer, cervical cancer, vulvar cancer, ovarian cancer, quality of life, sexuality

Scientific investigator(s) (Contact)

Name of the director Ramanah

Surname Rajeev

Address 3 boulevard Fleming, 25000 BESANCON

Phone +33 (0)3 81 21 89 86

Main features

Type of database

Type of database Study databases

Study databases (details) Longitudinal study (except cohorts)

Database recruitment is carried out by an intermediary A selection of health institutions and services

Database recruitment is carried out as part of an interventional study No

Database objective

Main objective ? Main objective To study factors (clinical, biological, sociodemographic, behavioural) associated with quality of life (QoL) in real-life situations, in patients with gynecologic cancers, namely endometrial cancer, cervical cancer, vulvar and vaginal cancer and ovarian cancer. ? Secondary Objectives To describe patient characteristics at baseline and compare QoL data of cohort patients with European and French data To compare QoL of patients who have undergone surgery for endometrial and cervical cancer according to different surgical approaches: Laparoscopy versus laparotomy Robot-assisted versus conventional laparoscopic surgery To assess QoL over time and for the "long-term" in patients with ovarian cancer, particularly those receiving intraperitoneal perioperative adjuvant chemotherapy To assess the impact of targeted therapies on the QoL of patients with cervical and ovarian cancer To analyse time up to QoL deterioration in ovarian cancer and

to research factors associated with deterioration To determine if QoL is different depending on the histological type of endometrial cancer To compare QoL of patients who have received and have not received adjuvant CT after surgery and radiotherapy for endometrial cancer To evaluate the importance of early palliative care patients in QoL Validation of SAQ sexuality questionnaire in French

Inclusion criteria

Selected pelvic cancers are cervical, uterine body, ovarian, vaginal and vulvar cancer, irrespective of histological type and stage: - Follow-up in Franche-Comté and the Georges François Leclerc Centre in Dijon - Age: 18 years and over - good knowledge of French - Able to respond to questionnaires (no major cognitive impairment) - Living in Franche Comté and Burgundy at time of diagnosis - having given signed consent - Covered by Social Security

Population type

Age
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered Sick population

Gender Woman

Geography area Regional

French regions covered by the database Bourgogne Franche-Comté

Detail of the geography area Franche-Comté - Burgundy

Data collection

Dates

Date of first collection (YYYY or MM/YYYY) 2015

Size of the database

Size of the database (number of individuals) [500-1000[individuals

Details of the number of individuals ---

Data

Database activity Current data collection

Type of data collected Clinical data
Declarative data
Biological data
Administrative data

Clinical data (detail) Direct physical measures

Declarative data (detail) Paper self-questionnaire
Face to face interview

Biological data (detail) Biomarkers

Administrative data (detail) Socio-demographic data: year and place of birth,
nationality, level of education, marital status, socio-
professional group (according to INSEE PCS),
employment
(employment/unemployment/inactivity), annual
income

Presence of a biobank No

Health parameters studied Health event/morbidity
Health event/mortality
Health care consumption and services
Quality of life/health perception

Care consumption (detail) Hospitalization
Medical/paramedical consultation
Medicines consumption

Procedures

Participant monitoring Yes

Details on monitoring of
participants Minium 24 months
