

UMB-SMF group database - Transversal study on joint mother-child hospital admissions

Head :Sutter Anne-Laure, Université de Bordeaux, U657, 33000 Bordeaux, France INSERM U657, 33000 Bordeaux, France Centre Hospitalier Charles Perrens, 33000 Bordeaux, France

Last update : 03/03/2015 | Version : 1 | ID : 22130

General

Identification

Detailed name Transversal study on joint mother-child hospital admissions

Sign or acronym UMB-SMF group database

General Aspects

Medical area Psychology and psychiatry

Health determinants Social and psychosocial factors

Keywords traitement, inpatient, mother, baby, mental health, Risk factors

Scientific investigator(s) (Contact)

Name of the director Sutter

Surname Anne-Laure

Phone +33 (0)5 56 56 17 83

Email alsutter@ch-perrens.fr

Unit Université de Bordeaux, U657, 33000 Bordeaux, France
INSERM U657, 33000 Bordeaux, France

Organization Société Marcé francophone et

Collaborations

Participation in projects, networks and consortia Yes

Funding

Funding status	Public
Details	Inserm et Société Marcé francophone (SMF)
Governance of the database	
Sponsor(s) or organisation(s) responsible	Institut national de la santé et de la recherche médicale - Inserm
Organisation status	Public
Sponsor(s) or organisation(s) responsible	Société Marcé francophone
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	All Joint mother-baby hospitalization for more than five full days at one of the mother-baby units of a mother with her child under one year.
Database objective	
Main objective	Build a database for describing joint mother-child hospital admissions in France, Belgium and Luxembourg that may be used to test a number of clinical hypotheses, particularly assumptions about factors of maternal and paternal mental health improvement and risk factors for the child développement and safety.
Inclusion criteria	Joint mother-baby hospitalization for more than five full days at one of the mother-baby units of a mother with her child under one year.

Population type	
Age	Newborns (birth to 28 days) Infant (28 days to 2 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years)
Population covered	General population
Gender	Woman
Geography area	International
Detail of the geography area	France, Belgium and Luxembourg.
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	01/2001
Date of last collection (YYYY or MM/YYYY)	12/2010
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	1434
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures
Details of collected clinical data	pregnancy and postpartum hospitalization files
Declarative data (detail)	Paper self-questionnaire Face to face interview
Details of collected declarative data	pregnancy and postpartum hospitalization files
Presence of a biobank	No

Health parameters studied	Health event/morbidity Health care consumption and services Quality of life/health perception
Care consumption (detail)	Hospitalization
Procedures	
Data collection method	questionnaire completed at admission and at discharge for all the joint admission fulfilling the inclusion criteria
Quality procedure(s) used	Ccontrol procedures as been achieve at an INSERM unit during all the 10 years supervised by Nine Glangeaud. validity of the full data base has been also check at an INSERM Unit supervised by Anne-Laure Sutter.
Participant monitoring	Yes
Details on monitoring of participants	during joint mother-child admission
