| Additional contact | |
| Main features | |
| Type of database | |
| Type of database | Study databases |
| Study databases (details) | Not-repeated cross-sectional studies (except case control studies) |
| Database recruitment is carried out by an intermediary | A selection of health institutions and services |
| Database recruitment is carried out as part of an interventional study | No |
| Additional information regarding sample selection. | Random sample of patients from hospitals performing elective abortions. |
| Database objective | |
| Main objective | To analyse the regional differences between Guadeloupe and La Réunion in terms of contraceptive practice before and after abortion. |
| Inclusion criteria | - Women - adult - native of Guadeloupe or La Réunion |
| Population type | |
| Age | Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) |
| Population covered | General population |
| Gender | Woman |
| Geography area | National |
| Detail of the geography area | Islands of Guadeloupe and La Réunion |
| Data collection | |
| Dates | |

Date of first collection (YYYY or MM/YYYY) 2007

Size of the database

Size of the database (number of individuals) [1000-10 000[individuals

Details of the number of individuals 2742: - Guadeloupe: 1211 - Réunion: 1531

Data

Database activity Data collection completed

Type of data collected Declarative data

Declarative data (detail) Paper self-questionnaire

Presence of a biobank No

Health parameters studied Health care consumption and services

Care consumption (detail) Hospitalization
Medicines consumption

Procedures

Data collection method Data are collected at the time of the abortion by healthcare professionals and the patients.

Participant monitoring No

Links to administrative sources No
