Organisation status	Public
Sponsor(s) or organisation(s) responsible	InVS - Institut de Veille Sanitaire
Organisation status	Public
Sponsor(s) or organisation(s) responsible	Fondation MGEN pour la santé publique
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	The study has been realized through a random survey from a base of telephone numbers including red lists. The selection of the person of the household to be questioned has been done with the anniversary method. A total of 6498 individuals have been questioned, between them 4042 replied to a long version and 2456 to a short version. Individuals having experienced a long sadness or anhedonia have been over-represented in the long version.
Database objective	
Main objective	Anadep study was conceived within the framework of the Psychiatry and Mental Health (PPSM) 2005-2008 plan, for the first great Inpes campaign on depression. This study launched in 2005 is the largest survey among general population on the theme of depression in France. Its main objectives are to estimate the prevalence of the major depressive episode (EDM) among general population and to study the associated factors, to explore health care use for mental health reasons and representations linked to the disease, the treatments or the professionals. The study of the comorbidity (anxiety, problematic alcohol

consumption) has been another objective of the study.

Inclusion criteria

Being aged between 15 and 75 years, resident in metropolitan France, able to speak French

Population type

Age

Adolescence (13 to 18 years)
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)

Population covered

General population

Gender

Male
Woman

Geography area

National

Detail of the geography area

Metropolitan France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)

2005

Size of the database

Size of the database (number of individuals)

[1000-10 000[individuals

Details of the number of individuals

6498

Data

Database activity

Data collection completed

Type of data collected

Declarative data

Declarative data (detail)

Phone interview

Presence of a biobank

No

Health parameters studied

Health event/morbidity
Health care consumption and services

Care consumption (detail)

Hospitalization

Medical/paramedical consultation
Medicines consumption

Procedures

Classifications used DSM IV - CIDI-SF - DETA

Participant monitoring No

Links to administrative sources No
