Main features	
Type of database	
Type of database	Morbidity registers
Additional information regarding sample selection.	Via: - Laboratories: Anatomopathology, Haematology - Health Institution Medical Information Departments - Healthcare services - Public and private institutions - DRSM/RSI health insurance medical services
Database objective	
Main objective	Objectives of the registry in terms of public health (monitoring, evaluation) - To provide data concerning specific incidences of cancer types in Guadeloupe in order to give those involved in public health care the necessary elements to adapt care provided and improve population health. - To contribute to the assessment of patient treatment throughout different phases (prevention, access to care, diagnostic and therapeutic treatment, follow-up) from registry data (stage, treatment modalities, mortality). - To give the registry an inter-regional, national and international dimension by comparing data with other départements in France, Caribbean countries with similar resources (Cuba, Barbados) and other worldwide regions to produce an etiological hypotheses. Objectives of the register in terms of research - to study the epidemiology of cancers in Guadeloupe and in French Overseas Départements in America (DFA) in collaboration with registers in Martinique and Guyana. - To identify specific public health problems from the register concerning regional malignancy in order to implement specific research protocols; - To investigate the territorial distribution of cancer (spatial heterogeneity) and possible association with areas containing the highest soil contamination of organochlorine pesticides and other environmental

pollutants. - To identify other environmental, genetic or nutritional factors that may be involved in the onset of certain cancers in Guadeloupe.

Inclusion criteria

Cancer in all locations throughout Guadeloupe, Saint-Martin and Saint-Barthélemy community and dependencies

Population type

Age

Newborns (birth to 28 days)
Infant (28 days to 2 years)
Early childhood (2 to 5 years)
Childhood (6 to 13 years)
Adolescence (13 to 18 years)
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered

Sick population

Gender

Male
Woman

Geography area

Departmental

French regions covered by the database

Guadeloupe

Detail of the geography area

Guadeloupe

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)

2008

Size of the database

Size of the database (number of individuals)

[1000-10 000[individuals

Details of the number of individuals

4500 (2012)

Data

Database activity

Current data collection

Type of data collected

Clinical data

	Biological data Administrative data
Clinical data (detail)	Direct physical measures
Biological data (detail)	Immunological and hormonal markers, molecular biology
Administrative data (detail)	Residential address, occupation
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality Health care consumption and services
Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption
Procedures	
Data collection method	INFORMATION SHEET FOR NEW CASES
Classifications used	CIM-O3 (International Classification of Diseases for Oncology, 3rd Edition)
Participant monitoring	Yes
Details on monitoring of participants	Information concerning health episodes (recurrence and metastases) and vital status are updated during follow-up
Links to administrative sources	No
Promotion and access	
Promotion
