

Epippain - Long-term Neurological Effects of Pain and Analgesia and Sedation Treatment in Neonates

Head :Carbajal Ricardo, INSERM UNITE 149. RECHERCHES EPIDEMIOLOGIQUES EN SANTE PERINATALE ET SANTE DES FEMMES

Last update : 09/05/2017 | Version : 2 | ID : 60122

General

Identification

Detailed name	Long-term Neurological Effects of Pain and Analgesia and Sedation Treatment in Neonates
---------------	---

Sign or acronym	Epippain
-----------------	----------

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	Accord CNIL: 01/07/2005
--	-------------------------

General Aspects

Medical area	Pediatrics
--------------	------------

Health determinants	Iatrogenic
---------------------	------------

Keywords	painful procedures, analgesia, neurological development, neonatal critical period, Health events, neonatal intensive care
----------	---

Scientific investigator(s) (Contact)

Name of the director	Carbajal
----------------------	----------

Surname	Ricardo
---------	---------

Address	75012 PARIS
---------	-------------

Email	ricardo.carbajal@trs.aphp.fr
-------	------------------------------

Unit	INSERM UNITE 149. RECHERCHES EPIDEMIOLOGIQUES EN SANTE PERINATALE ET SANTE DES FEMMES
------	---

Organization	INSERM
--------------	--------

Collaborations

Participation in projects, networks and consortia	Yes
---	-----

Funding

Funding status	Public
----------------	--------

Details	Fondation CNP, Fondation de France
---------	------------------------------------

Governance of the database

Sponsor(s) or organisation(s) responsible	ASSOCIATION URGENCES PEDIATRIQUES TROUSSEAU (HOPITAL ARMAND TROUSSEAU, PARIS)
---	---

Organisation status	Public
---------------------	--------

Additional contact

Main features

Type of database

Type of database	Study databases
------------------	-----------------

Study databases (details)	Longitudinal study (except cohorts)
---------------------------	-------------------------------------

Database recruitment is carried out by an intermediary	A selection of health institutions and services
--	---

Database recruitment is carried out as part of an interventional study	No
--	----

Additional information regarding sample selection.	Inclusion method: Retrospective Other bodies active in creating this cohort: CHU, CHG, INDEPENDENT PHYSICIANS
--	---

Database objective

Main objective	To investigate the long-term neurological effects of pain as well as analgesia and sedation treatment administered to neonates
----------------	--

Inclusion criteria	Children who were hospitalised in intensive care during neonatal period
--------------------	---

Population type

Age	Newborns (birth to 28 days)
-----	-----------------------------

Population covered	Sick population
--------------------	-----------------

Gender	Male Woman
Geography area	Regional
French regions covered by the database	Île-de-France
Detail of the geography area	Multicentric cohort in ILE-DE-FRANCE (13 centres)
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	09/2005
Date of last collection (YYYY or MM/YYYY)	01/2006
Size of the database	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	430
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Face to face interview
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality
Procedures	
Data collection method	Interview: Entry from a paper questionnaire (Manual input)
Participant monitoring	Yes
Details on monitoring of participants	(Indefinite duration)
Links to administrative sources	No

Promotion and access

Promotion

Link to the document	http://tinyurl.com/Hal-EIPPPAIN
