

IRMA - Renal Insufficiency and Anticancer Drugs

Head :Launay-Vacher Vincent, Département de néphrologie

Last update : 09/05/2017 | Version : 1 | ID : 7961

General

Identification

Detailed name Renal Insufficiency and Anticancer Drugs

Sign or acronym IRMA

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation Accord CNIL

General Aspects

Medical area Cancer research
Urology, andrology and nephrology

Health determinants Iatrogenic
Medicine

Keywords cancer medications, creatinine, Prevalence, renal function

Scientific investigator(s) (Contact)

Name of the director Launay-Vacher

Surname Vincent

Address 47-83 Boulevard de l'Hopital, 75013 Paris

Email vincent.launay-vacher@psl.aphp.fr

Unit Département de néphrologie

Collaborations

Funding

Funding status Public

Details	APHP
Governance of the database	
Sponsor(s) or organisation(s) responsible	Assistance Publique - Hôpitaux de Paris
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is made on the basis of:	Medication(s) taken
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Patients presenting with a solid tumour.
Database objective	
Main objective	To determine the prevalence of renal impairment in cancer patients in France.
Inclusion criteria	- Men or women - aged between 18 and 95 years old - patients receiving cancer treatment
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population
Gender	Male

Woman

Geography area

National

Detail of the geography area

15 medical oncology services

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)

2004

Size of the database

Size of the database (number of individuals)

[1000-10 000[individuals

Details of the number of individuals

4 684

Data

Data collection completed

Type of data collected

Clinical data

Clinical data (detail)

Direct physical measures
Medical registration

Presence of a biobank

No

Health parameters studied

Health event/morbidity
Health event/mortality

Procedures

Data collection method

Data collected over 2 periods of 15 consecutive days. Renal function is calculated using Cockcroft-Gault to assess the creatinine clearance rate (ClCr) and an "abbreviated" or "simplified" Modification of Diet in Renal Disease (aMDRD) formulae to estimate glomerular filtration rate (GFR).

Participant monitoring

No
