

# PRESAGE - Observationnal study on Postmenopausal woman

Head :Hébuterne Xavier, Eli Lilly France

Last update : 01/01/2018 | Version : 1 | ID : 68

## General

### Identification

Detailed name                      Observationnal study on Postmenopausal woman

Sign or acronym                      PRESAGE

CNIL registration number,  
number and date of CPP  
agreement, AFSSAPS (French  
Health Products Safety Agency)  
authorisation                      CNIL N°907026

### General Aspects

Medical area                      Rheumatology

Others (details)                      osteoporosis

Keywords                      Postmenopausal women, mineral bone density,  
osteoporosis

### Scientific investigator(s) (Contact)

Name of the director                      Hébuterne

Surname                      Xavier

Email                      PHARMACOEPI\_FRMAIL@LILLY.COM

Unit                      Eli Lilly France

### Collaborations

#### Funding

Funding status                      Private

Details                      Eli Lilly and Company

### Governance of the database

Sponsor(s) or organisation(s)  
responsible                      Eli Lilly

Organisation status	Private
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health care professionals A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Recruitment of patients in private-practicing or hospital BMD centers directed by rheumatologists in the normal practice of care.
Database objective	
Main objective	Primary objective: estimate the percentage of osteoporotic patients among postmenopausal patients with a mineral bone density measurement for diagnosis purposes and who can benefit from therapeutic recommendations according to French recommendations. Secondary objectives: factors associated with osteoporosis, characteristics and care for patients
Inclusion criteria	Postmenopausal woman, - Patient not treated for osteoporosis for at least one year (HRT, raloxifene, bisphosphonate, teriparatide, strontium ranelate), - Patient coming for a bone densitometry for diagnosis purposes, - Patient able to benefit from a therapeutic recommendation for the treatment of osteoporosis (osteopenic or osteoporotic patient with risk factors of fractures).
Population type	
Age	Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)

Population covered	Sick population
Gender	Woman
Geography area	National
Detail of the geography area	National
<b>Data collection</b>	
<b>Dates</b>	
Date of first collection (YYYY or MM/YYYY)	2007
Date of last collection (YYYY or MM/YYYY)	2008
<b>Size of the database</b>	
Size of the database (number of individuals)	[500-1000[ individuals
Details of the number of individuals	646
<b>Data</b>	
Database activity	Data collection completed
Type of data collected	Clinical data Paraclinical data
Clinical data (detail)	Direct physical measures Medical registration
Paraclinical data (detail)	Bone densitometry
Presence of a biobank	No
Health parameters studied	Health event/morbidity
<b>Procedures</b>	
Data collection method	Data collection notebook
Participant monitoring	No
Links to administrative sources	No
<b>Promotion and access</b>
