--------------------	--

## Population type

Age	Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	9 CHR/U in France

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY) 2001

### Size of the database

Size of the database (number of individuals) [1000-10 000[ individuals

Details of the number of individuals 1306

### Data

Database activity Current data collection

Type of data collected Clinical data

Clinical data (detail) Direct physical measures

Presence of a biobank No

Health parameters studied  
Health event/morbidity  
Health event/mortality  
Quality of life/health perception

### Procedures

Data collection method Via clinical records

Participant monitoring Yes

Details on monitoring of participants Monitored for 24 months

Links to administrative sources No

## Promotion and access
