CRB-REFGENSEP - Biological Resources Centre (BRC) of The French Multiple Sclerosis Genetics Group

Head :Fontaine Bertrand, CRICM INSERM U 975 Rebeix Isabelle, INSERM UMR S 975. CRICM

| Last update : 05/12/2015 Version : 1 ID : 5153 | | |
|--|--|--|
| General | | |
| Identification | | |
| Detailed name | Biological Resources Centre (BRC) of The French Multiple Sclerosis Genetics Group | |
| Sign or acronym | CRB-REFGENSEP | |
| CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation | CNIL no. 00239 (05/02/2001), no. DC-2008-539, no. AC-2008-548. | |
| General Aspects | | |

| Medical area | Neurology |
|---------------------|---|
| Health determinants | Genetic |
| Keywords | genetic and clinical criteria, patients |

Surname

| Scientific investigator(s) (Contact) | |
|---|---------------------------------------|
| Name of the director | Fontaine |
| Surname | Bertrand |
| Address | 47 boulevard de l'hôpital 75013 Paris |
| Phone | + 33 (0)1 57 27 40 53 |
| Email | bertrand.fontaine@upmc.fr |
| Unit | CRICM INSERM U 975 |
| Organization | INSERM |
| Name of the director | Rebeix |

Isabelle

Address CRICM UMR S 975, Hôpital Pitié-Salpêtrière. 47 bd

de l'hôpital 75013 PARIS

Phone + 33 (0)1 57 27 44 08

Main features

Type of database

Type of database Study databases

Study databases (details)

Longitudinal study (except cohorts)

Database recruitment is carried out as part of an interventional

study

No

Additional information regarding

sample selection.

Campaign to obtain samples from 23 French hospital centres.

Database objective

Main objective To make a collection of DNA and cells from patients

with multiple sclerosis and their relatives that can be accessed by the scientific community (any team on

request).

Inclusion criteria Adult patients with multiple sclerosis and their

relatives.

| Age Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (25 to 49 years) Elderly (65 to 79 years) Population covered Sick population Gender Male Woman Geography area National Detail of the geography area France Data collection Dates Date of first collection (YYYY or MM/YYYY) Size of the database Size of the database Size of the database (number of individuals) Details of the number of individuals Data Database activity Current data collection Type of data collected Clinical data Biological data Administrative data Clinical data (detail) Medical registration Biological data (detail) HLA (human leukocyte antigen) genotype and SNP (single-nucleotide polymorphism) genotype. | Cell lines | Presence of a biobank | Yes |
| | Contents of biobank | Cell lines |

| Details of biobank content | Biological samples are available to any research team on request. This request will be assessed by the CRB-REFGENSP scientific committee |
|--|--|
| Health parameters studied | Health event/morbidity Health event/mortality |
| Procedures | |
| Data collection method | The following is collected during the clinical examination in a REFGENSEP network collection centre: age of disease onset, disease type and disability (EDSS/Expanded Disability Status Scale). Genetic annotations are collected during collaborations with research teams. |
| Participant monitoring | Yes |
| Details on monitoring of participants | Disease progression, in terms of disability, is monitored during consultations. |
