Population type

Age Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)

Population covered Sick population

Gender Male
Woman

Geography area Departmental

French regions covered by the database Auvergne Rhône-Alpes

Detail of the geography area	Puy de Dôme
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	04/2001
Size of the database	
Size of the database (number of individuals)	Greater than 20 000 individuals
Details of the number of individuals	28,750
Data	
Database activity	Current data collection
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures Medical registration
Declarative data (detail)	Face to face interview
Presence of a biobank	No
Health parameters studied	Health event/morbidity
Procedures	
Data collection method	Shared medical-social file (digital), communicated in real time by various key players so the trajectories of each patient can be monitored.
Participant monitoring	Yes
Links to administrative sources	No
Promotion and access	
Promotion	
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Professional access (shared file).

Access to aggregated data

Access on specific project only

Access to individual data
