Population type

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	Sick population
Gender	Male Woman
Geography area	Departmental
French regions covered by the database	Auvergne Rhône-Alpes

Detail of the geography area	Puy de Dôme

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	04/2001

Size of the database

Size of the database (number of individuals)	Greater than 20 000 individuals
Details of the number of individuals	28,750

Data

Database activity	Current data collection
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures Medical registration
Declarative data (detail)	Face to face interview
Presence of a biobank	No
Health parameters studied	Health event/morbidity

Procedures

Data collection method	Shared medical-social file (digital), communicated in real time by various key players so the trajectories of each patient can be monitored.
Participant monitoring	Yes
Links to administrative sources	No

Promotion and access

Promotion

Access

Terms of data access (charter for data provision, format of data, availability delay)	Professional access (shared file).

Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
