

PRIME - Cohort of Males Aged 50-59 Years Old: Prospective Myocardial Infarction Study

Head :Ducimetière Pierre, U780

Last update : 05/12/2015 | Version : 1 | ID : 60075

General

Identification

Detailed name Cohort of Males Aged 50-59 Years Old: Prospective Myocardial Infarction Study

Sign or acronym PRIME

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation CNIL approval

General Aspects

Medical area Cardiology

Health determinants Genetic
Lifestyle and behavior
Nutrition
Occupation

Keywords ischaemic heart disease, cardiovascular events, health events, cancer

Scientific investigator(s) (Contact)

Name of the director Ducimetière

Surname Pierre

Email pierre.ducimetiere@inserm.fr

Unit U780

Organization INSERM - Institut National de Santé et Recherche

Collaborations

Participation in projects, networks and consortia Yes

Details	Cohort network involvement: MORGAN INTERNATIONAL CONSORTIUM: COHORT CONSORTIUM, COLLABORATION WITH THE CAMBRIDGE TEAM: CVA FIBRINOGEN STUDY COLLABORATION.
Funding	
Funding status	Mixed
Details	Merck and public.
Governance of the database	
Sponsor(s) or organisation(s) responsible	Institut National de la Santé et de la Recherche Médicale
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Inclusion method: prospective.
Database objective	
Main objective	General objective: prospective and epidemiological study on ischaemic cardiac events.
Inclusion criteria	Sample of 50-59-year old males.
Population type	
Age	Adulthood (45 to 64 years)
Population covered	General population

Gender	Male
Geography area	Local
French regions covered by the database	Alsace Champagne-Ardenne Lorraine Languedoc-Roussillon Midi-Pyrénées Nord - Pas-de-Calais Picardie
Detail of the geography area	Multicentric cohort (4 centres): LILLE, TOULOUSE, BELFAST and STRASBOURG.
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	01/1991
Size of the database	
Size of the database (number of individuals)	[10 000-20 000[individuals
Details of the number of individuals	10,592
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data Paraclinical data Biological data
Clinical data (detail)	Direct physical measures Medical registration
Details of collected clinical data	Clinical examination at baseline. Information collected during clinical examination: anthropometric measurements, blood pressure, heart rate, LSHTM chest pain questionnaire, ECG, treatment.
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	Self-administered questionnaire at baseline and during follow-up every year. Information collected by self-administered questionnaire: at baseline: demographic, socioeconomic and dietetic data; follow-up: clinical events. Interview questionnaire at baseline. Information collected during interview: additional questions: social and education level,

work and activities, personal history, family history, smoking, diet, alcohol consumption, drug use, physical activity, symptoms and psychosocial factors.

Paraclinical data (detail)

Waist-hip ratio.

Biological data (detail)

Type of samples taken: Blood.

Presence of a biobank

Yes

Contents of biobank

Serum
Plasma
DNA

Details of biobank content

Serum bank, plasma bank, DNA bank.

Health parameters studied

Health event/morbidity
Health event/mortality

Procedures

Data collection method

Self-administered questionnaire: from a paper questionnaire. Interview: from a paper questionnaire. Clinical examination: handwritten.

Quality procedure(s) used

Consistency request after electronic data is recorded.

Participant monitoring

Yes

Details on monitoring of participants

Follow-up duration: 10 years.

Links to administrative sources

Yes

Linked administrative sources (detail)

PATIENT HOSPITAL RECORD OR TREATING PHYSICIAN'S RECORD FOR FOLLOW-UP AND NOT FOR ENROLMENT, MORTALITY REGISTRY.

Promotion and access

Promotion

Access

Terms of data access (charter for data provision, format of data, availability delay)

Data may be used by academic teams.
Data may be used by industrial teams.

Access to aggregated data

Access on specific project only

Access to individual data

Access on specific project only
