

- Cohort of Females Receiving Single Blastocyst Transfer During In Vitro Fertilization

Head :Guerif Fabrice, UMR 0085 PRC Reproductive Physiology and Behaviour

Royer Dominique, UMR 0085 PRC Reproductive Physiology and Behaviour

Last update : 09/05/2017 | Version : 1 | ID : 73180

General

Identification

Detailed name Cohort of Females Receiving Single Blastocyst Transfer During In Vitro Fertilization

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation CNIL

General Aspects

Medical area Anatomy - Cytology
Gynecology/ obstetrics

Health determinants Healthcare system and access to health care services
Iatrogenic

Keywords multiple births, blastocyst transfer, embryo, in vitro fertilisation

Scientific investigator(s) (Contact)

Name of the director Guerif

Surname Fabrice

Unit	UMR 0085 PRC Reproductive Physiology and Behaviour
Organization	INRA
Collaborations	
Funding	
Funding status	Public
Details	INRA
Governance of the database	
Sponsor(s) or organisation(s) responsible	INRA
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	Yes
Details	Performed at group level (clusters)
Additional information regarding sample selection.	3 groups according to number of high-quality embryos available on day two.
Database objective	
Main objective	This study aims to improve knowledge regarding in vitro fertilisation and to better understand the relationship between the number of implanted embryos/blastocyst transfers and birth.
Inclusion criteria	Inclusion criteria: females under 36 years of age; First or second attempt at in vitro fertilisation; Voluntary single transfer of blastocyst

Population type

Age
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)

Population covered
Sick population

Gender
Woman

Geography area
Local

French regions covered by the database
Centre-Val de Loire

Detail of the geography area
Tours

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)
2003

Date of last collection (YYYY or MM/YYYY)
2007

Size of the database

Size of the database (number of individuals)
< 500 individuals

Details of the number of individuals
436

Data

Database activity
Data collection completed

Type of data collected
Clinical data
Biological data

Clinical data (detail)
Direct physical measures

Details of collected clinical data
Foetal development

Biological data (detail)
Blood hCG levels 7 days after blastocyst transfer

Presence of a biobank
No

Health parameters studied
Health care consumption and services

Care consumption (detail)
Medicines consumption

Procedures

Data collection method	By medical personnel
Participant monitoring	Yes
Details on monitoring of participants	Follow-up at 7 days and 5 weeks
Links to administrative sources	No
