Main features

Type of database

Type of database	Study databases
Study databases (details)	Cohort study

Database recruitment is carried out by an intermediary A selection of health institutions and services

Database recruitment is carried out as part of an interventional study No

Additional information regarding sample selection. Young women in the adolescent psychiatric unit at the Institute Mutual Montsouris who meet the

inclusion criteria and agreed to participate in the study.

Database objective

Main objective To study the relationship between depression, anxiety (including social phobia), obsessive behaviour and eating symptoms and nutritional status on admission (Body Mass Index (BMI) and extent of weight loss), as well as the duration of the illness. Long-term BMI progress is also included.

Inclusion criteria Mental eating disorder diagnosis (Diagnostic and Statistical Manual IV: DSM-IV);
Young women between 13 and 21 years old;
Admitted to adolescent psychiatric unit at the Institute Mutual Montsouris, Paris, France, between 1999 and 2000.

Population type

Age Adolescence (13 to 18 years)
Adulthood (19 to 24 years)

Population covered Sick population

Gender Woman

Geography area Regional

French regions covered by the database Île-de-France

Detail of the geography area Ile de France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY) 1999

Date of last collection (YYYY or MM/YYYY) 2012

Size of the database

Size of the database (number of individuals) < 500 individuals

Details of the number of individuals 24

Data

Database activity Data collection completed

Type of data collected Clinical data

Clinical data (detail) Medical registration

Details of collected clinical data Nutritional status (BMI, weight loss in relation to hospital admission) ? Depressive symptoms: Beck Depression Inventory (BDI), Hamilton Rating Scale for Depression (HRSD) ? Symptoms of anxiety: Spielberger State-Trait Anxiety Inventory (STAI-I, II), Hamilton Rating Scale for Anxiety (HARS). ? Social phobia symptoms: Liebowitz Social Anxiety Scale (LSAS) ? Obsessive and compulsive symptoms: Yale-Brown Obsessive-Compulsive Scale (Y-BOCS) ? Eating habits: Yale-Brown Obsessive-Compulsive Scale for Eating Disorders (Y-BOCS-ED).

Presence of a biobank No

Health parameters studied Health event/morbidity
Health care consumption and services
Quality of life/health perception

Care consumption (detail) Hospitalization
Medical/paramedical consultation
Medicines consumption

Procedures

Data collection method Data collected by a psychiatrist

Participant monitoring Yes

Monitoring procedures Monitoring by contact with the referring doctor

Details on monitoring of participants First week of hospitalisation, last week of hospitalisation and long-term follow-up (4 to 12 years after)

Links to administrative sources No
