

KBP-CPHG - Cohort of Patients with Primary Bronchial Lung Cancer

Head :Grivaux Michel, Pulmonology

Last update : 01/01/2020 | Version : 1 | ID : 73306

General	
Identification	
Detailed name	Cohort of Patients with Primary Bronchial Lung Cancer
Sign or acronym	KBP-CPHG
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	2000: CNIL 900019; 2010 CNIL 909479
General Aspects	
Medical area	Cancer research Pneumology
Pathology (details)	Primary bronchial lung cancer
Health determinants	Genetic Lifestyle and behavior Pollution Social and psychosocial factors
Keywords	general hospitals, adenocarcinoma, bronchopulmonary cancer (BPC), patient treatment, epidemiology
Scientific investigator(s) (Contact)	
Name of the director	Grivaux
Surname	Michel
Address	6-8 rue Saint-Fiacre, BP 218, 77104 Meaux cedex
Email	m-grivaux@ch-meaux.fr
Unit	Pulmonology
Organization	Meaux Hospital

Collaborations	
Funding	
Funding status	Mixed
Details	Respiratory Health Research, CPHG, AstraZeneca, Boehringer Ingelheim, Chugai, GlaxoSmithKline, Lilly France, Pfizer, Pierre Fabre Oncologie, Pneumologie Développement, Roche, and Sanofi-Aventis
Governance of the database	
Sponsor(s) or organisation(s) responsible	Collège des Pneumologues des Hôpitaux Généraux
Organisation status	Private
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is made on the basis of:	Another treatment or procedure
Database recruitment is carried out as part of an interventional study	No
Database objective	
Main objective	The main aim is to study patient mortality at 5 years and risk factors. Secondary aims are: ? to describe the characteristics in this patient population, their cancer and treatment methods; ? to estimate the survival rate at 1, 4 and 5 years; ? to compare data obtained with data from the KBP-2000-CPHG study (same study type, centre and patient recruitment methods, patient inclusion criteria and several common items in both questionnaires).
Inclusion criteria	All patients with histological and cytological BPC

diagnosed between 01 January and 31 December 2000 and 01 January and 31 December 2010. Patients monitored by the pulmonology unit in one of the general hospitals centres (GHC).

Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2000
Date of last collection (YYYY or MM/YYYY)	2010
Size of the database	
Size of the database (number of individuals)	[10 000-20 000[individuals
Details of the number of individuals	2000: 4,669; 2010: 7,051
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures
Details of collected clinical data	BPC diagnostic methods (recruitment, symptoms, radiography, sampling method and sample location that led to diagnosis, date of diagnosis,

anatomopathological test); functional status based on Performance Status (PS) score; BPC histological type according to World Health Organisation classification and obtained from histological or cytological results (small-cell carcinoma, adenocarcinoma, squamous-cell carcinoma, large-cell carcinoma, bronchioloalveolar carcinoma); cancer stage at time of diagnosis based on Tumor-Node-Metastasis [TNM] clinical NSCLC classification according to the Mountain criteria; treatment strategies and initial therapy chosen by physician.

Declarative data (detail)

Face to face interview

Details of collected declarative data

Social and demographic data (age, sex, socio-professional category [INSEE socio-professional categories] and suspected work-related cancer); smoking (number of pack years, duration, any smoking cessation and stop date).

Presence of a biobank

No

Health parameters studied

Health event/morbidity
Health event/mortality
Health care consumption and services

Procedures

Data collection method

By participating physicians.

Participant monitoring

Yes

Monitoring procedures

Monitoring by contact with the referring doctor

Details on monitoring of participants

Follow-up at 1, 4 and 5 years (date and cause of death of deceased patients and date of last actual contact with living patients were stated in each record).
