## **REPEATERS - Cohort of Patients Admitted to Hospital Following** Suicide Attempt

Head :Ligier Fabienne, EA 4360 APEMAC, Nancy

Guillemin Francis, EA 4360 APEMAC, Nancy - INSERM CIC-EC 1433 Kabuth Bernard

Last update : 06/23/2016 | Version : 1 | ID : 73204

General	
Identification	
Detailed name	Cohort of Patients Admitted to Hospital Following Suicide Attempt
Sign or acronym	REPEATERS
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CCTIRS, CNIL (agreement 911143 v.0)
General Aspects	
Medical area	Psychology and psychiatry
Pathology (details)	Suicide
Health determinants	Healthcare system and access to health care services Lifestyle and behavior
Keywords	long-term outcome, follow-up, recurrence, suicide attempt, adolescent
Scientific investigator(s) (Contact)

Database recruitment is carried No out as part of an interventional study

Database objective	
Main objective	The aim of this study is to observe adolescent behaviour following a suicide attempt. This study shall determine and observe whether being lost to contact by medical staff the year following suicide attempt increases the risk of recurrence in adolescents (REPEATERS study) within 10 years of baseline suicide attempt.
Inclusion criteria	Adolescents (aged 13-18) admitted to hospital following a suicide attempt between 1994 and 2000 at Nancy University Children's Hospital to study the impact of being lost to contact.
Population type	
Age	Adolescence (13 to 18 years)
Population covered	Sick population
Gender	Male Woman
Geography area	Local
French regions covered by the database	Alsace Champagne-Ardenne Lorraine
Detail of the geography area	Nancy
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	1994
Date of last collection (YYYY or MM/YYYY)	2010
Size of the database	
Size of the database (number of individuals)	< 500 individuals

Promotion

246

Data	
Database activity	Current data collection
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures
Details of collected clinical data	Suicide attempt index; personal and family details were gathered from adolescent medical records: personal characteristics (sex, age, history of suicide attempts [yes/no]; psychiatric comorbidity [yes/no] according to classification; academic difficulties [yes/no] and family characteristics (marital relationship [separated or not]; employment status of each working parent [or not]; family history of suicide [yes/no] and parent alcohol dependence [yes/no]; details on length of hospitalisation; psychiatric follow-up [yes/no]; recurrence of suicide attempts throughout the year [early SA recurrence [yes/no]) and LCE (lost to contact early) status [yes/no].
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	A self-administered questionnaire was sent to patient to assess recurrence.
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services
Care consumption (detail)	Hospitalization Medical/paramedical consultation
Procedures	
Participant monitoring	Yes
Details on monitoring of participants	10-year follow-up after enrolment in the study.
Links to administrative sources	No
Promotion and access	

Access
