

# - Cohort of Patients with Depression: Toxic Effects on Brain Function

Head :Falissard Bruno , Inserm U1018 ? Centre for Research in Epidemiology and Population Health ? Team:  
Gender, Sexual and Reproductive Health  
Corruble Emmanuelle, INSERM U669 BICETRE UNIVERSITY HOSPITAL ? PSYCHIATRIC DEPARTMENT

Last update : 01/01/2018 | Version : 1 | ID : 4545

## General

### Identification

Detailed name Cohort of Patients with Depression: Toxic Effects on Brain Function

### General Aspects

Medical area Psychology and psychiatry

Keywords large sample, outpatient, treatment time, toxic effects, brain function, tests

### Scientific investigator(s) (Contact)

Name of the director	Falissard
Surname	Bruno
Address	CESP
Phone	+33 (0)1 58 41 58 50
Email	falissard_b@wanadoo.fr
Unit	Inserm U1018 ? Centre for Research in Epidemiology and Population Health ? Team: Gender, Sexual and Reproductive Health
Organization	INSTITUT NATIONAL DE LA SANTE ET DE LA RECHERCHE MEDICALE

Name of the director	Corruble
Surname	Emmanuelle
Phone	+ 33 (0)1 45 21 25 24
Email	emmanuelle.corruble@bct.aphp.fr
Unit	INSERM U669 BICETRE UNIVERSITY HOSPITAL ?

## PSYCHIATRIC DEPARTMENT

Organization INSERM ? National Institute of Health and Medical Research

### Collaborations

### Funding

Funding status Private

Details Eli Lilly, Lundbeck, Servier, UCB-Pharma, Janssen, Servier, Wyeth, Bristol-Myers Squibb, Pierre Fabre, Sanofi-Aventis, AstraZeneca, Eisai, P1Vital.

### Governance of the database

Sponsor(s) or organisation(s) responsible INSERM ? National Institute of Health and Medical Research

Organisation status Public

### Additional contact

### Main features

### Type of database

Type of database Study databases

Study databases (details) Cohort study

Database recruitment is carried out by an intermediary A selection of health care professionals

Database recruitment is carried out as part of an interventional study No

Additional information regarding sample selection. Outpatients from selected physicians meeting the inclusion criteria.

### Database objective

Main objective To assess the impact of depression on the hippocampus.

Inclusion criteria Outpatients from selected physicians who:  
? meet the DSM-IV criteria for major depressive disorder based on clinical assessment criteria;  
? were tested for delayed memory function during two visits several weeks apart.

Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2007
Date of last collection (YYYY or MM/YYYY)	2008
Size of the database	
Size of the database (number of individuals)	[1000-10 000[ individuals
Details of the number of individuals	8,229
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Medical registration
Details of collected clinical data	Anxiety and depression (Hospital Anxiety and Depression Scale), previous depressive episodes; treatment or non-treatment with antidepressants; previous mood disorders; Wechsler Memory Scale memory test (marker of hippocampal function).
Declarative data (detail)	Paper self-questionnaire
Presence of a biobank	No

Health parameters studied	Health event/morbidity Health care consumption and services
Care consumption (detail)	Medical/paramedical consultation Medicines consumption

## Procedures

Data collection method	Self-administered questionnaire: Hospital Anxiety and Depression Scale.
Participant monitoring	Yes
Monitoring procedures	Monitoring by contact with the referring doctor
Details on monitoring of participants	2 follow-up visits
Links to administrative sources	No
