## **EETP** - Case-Control Study on Students and Subjects with a Psychiatric Disorder. Translation and Validation of the French Temporal Experience of Pleasure Scale

Head :Falissard Bruno , CESP Berthoz Sylvie LOAS Gwenolé

Last update : 07/03/2016 | Version : 1 | ID : 4401

General	
Identification	
Detailed name	Case-Control Study on Students and Subjects with a Psychiatric Disorder. Translation and Validation of the French Temporal Experience of Pleasure Scale
Sign or acronym	EETP
General Aspects	
Medical area	Psychology and psychiatry
Pathology (details)	Schizophrenia
Health determinants	Social and psychosocial factors
Keywords	anticipatory pleasure, psychometric properties (validity, reliability), temporal experience of pleasure scale (TEPS), schizophrenia
Scientific investigator(s) (Contact)	
Name of the director	Falissard
Surname	Bruno
Phone	+33 (0)1 58 41 58 50
Email	falissard_b@wanadoo.fr
Unit	CESP
Organization	National Institute of Health and Medical Research
Name of the director	Berthoz
Name of the director Surname	Berthoz Sylvie

	Diagnoses made by the psychiatrist according to ICD-10 diagnostic criteria using research diagnostic criteria.
Database objective	
Main objective	To clarify the psychometric properties (validity, fidelity) of the French version of the TEPS and to confirm the deficit in schizophrenic subjects in relation to healthy subjects.
Inclusion criteria	Schizophrenic subjects were recruited from university hospital adult psychiatry services in Amiens and Lille, as well as patients recruited from the non-sectoral, short-stay psychology unit in Amiens University Hospital, and presenting with an affective, neurotic or personality disorder. Diagnoses made by the psychiatrist according to ICD-10 diagnostic criteria using research diagnostic criteria. Exclusion criteria: addicted to or misusing alcohol or psychoactive substances; severe organic disease and poor understanding of French.
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	Sick population
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Nord - Pas-de-Calais Picardie
Detail of the geography area	Northern France: Amiens, Lille
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2007
Date of last collection (YYYY or MM/YYYY)	2011
Size of the database	

Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	287
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data Paraclinical data
Clinical data (detail)	Medical registration
Details of collected clinical data	18-item TEPS, 61-item revised Physical Scale (PAS); 41-item Social Anhedonia Scale (SAS); 14-item Snaith Hamilton Pleasure Scale (SHAPS); 21-item Beck Depression Inventory-II (BDI-II); Anticipatory PAS (PAS-ANT) and PAS consummatory (PAS- CONS) scales for student control groups.
Declarative data (detail)	Face to face interview
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services
Care consumption (detail)	Medical/paramedical consultation Medicines consumption
Procedures	
Data collection method	All subjects completed the following questionnaires several days before discharge (for hospitalised patients) or at the end of the consultation (for outpatients).
Participant monitoring	No
Links to administrative sources	No
