Unit Inserm U1018 ? Centre for Research in Epidemiology and Population Health ? Team: Gender, Sexual and Reproductive Health

Organization National Institute of Health and Medical Research

Name of the director Godart

Surname Nathalie

Email	nathalie.godart@imm.fr
Organization	IMM
Collaborations	
Funding	
Funding status	Public
Details	INSERM
Governance of the database	
Sponsor(s) or organisation(s) responsible	INSERM - National Institute of Health and Medical Research
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Case control study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	705 patients with addictive behaviour and 786 controls.
Database objective	
Main objective	To verify whether anxiety disorders are more common in women with eating disorders.
Inclusion criteria	Patients with eating disorders (multicentric random draw).
Population type	
Age	Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years)

Adulthood (45 to 64 years)

Population covered Sick population

Gender Woman

Geography area National

Detail of the geography area France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY) 1994

Date of last collection (YYYY or MM/YYYY) 06/1997

Size of the database

Size of the database (number of individuals) [1000-10 000[individuals

Details of the number of individuals 1,491

Data

Database activity Data collection completed

Type of data collected Clinical data
Declarative data

Clinical data (detail) Medical registration

Details of collected clinical data Mini International Neuropsychiatric Interview; eating disorder diagnosis; mood disorder; anxiety; depressive episodes; BMI; Quetelet's Index

Details of collected declarative data Sociodemographic data

Presence of a biobank No

Health parameters studied Health event/morbidity

Procedures

Data collection method Mini International Neuropsychiatric Interview (MINI); French DSM-IV version

Participant monitoring	No
