Type of database

Health relevant administrative databases

Database objective

Main objective

The RIM-P is an medical-administrative tool for hospital activity. The main aim is to allow the better distribution of budget packages according to the healthcare costs of the illnesses treated within each establishment.

Through its contents, studies may be carried out on hospital morbidity (diagnoses, treatment methods); treatment analysis, as well as inter-regional and regional fluctuations between hospital admissions.

Finally, the tool significantly helps the decision-making process with regards to planning for healthcare establishments and throughout regions.

Inclusion criteria

Ongoing collection of activity in healthcare establishments authorised to practice psychiatric care.

Population type

Age

Newborns (birth to 28 days)
Infant (28 days to 2 years)
Early childhood (2 to 5 years)
Childhood (6 to 13 years)
Adolescence (13 to 18 years)
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered

Sick population

Gender

Male
Woman

Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2006
Size of the database	
Size of the database (number of individuals)	Greater than 20 000 individuals
Details of the number of individuals	Ongoing collection of healthcare activity in establishments authorised to practice psychiatric care.
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Administrative data
Clinical data (detail)	Direct physical measures Medical registration
Administrative data (detail)	Demographic data (age, sex, home post code); treatment location (establishment code, type of inpatient or outpatient care, duration).
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality Health care consumption and services
Care consumption (detail)	Hospitalization Medical/paramedical consultation
Procedures	
Data collection method	Batch summaries (RPS) for full-time and part-time treatment, and outpatient activity summaries (RAA) describing the establishment activity are submitted on a quarterly basis to the Technical Agency for Hospital Information (ATIH). These summaries include the following information: Patient age and sex ? home post code ? legal basis for care: voluntary or without consent; ? activity: day- or

night-time inpatient care; medical and psychological centre (CMP); outpatient treatment centre (CATTP), etc. ? diagnosis or grounds for principal and associated treatment (under ICD-10 coding). Specifically, for inpatient and outpatient care: ? length of stay (and session); ? admission and discharge method for stay (up to 2011); ? number of days in therapeutic isolation; ? Daily living activity dependence. Specifically for ambulatory services: ? Location of service; ? occupational category of stakeholders (MIPARESXY) ? type of service (EDGAR classification).

Classifications used ICD 10, MIPARESXY, EDGAR classification, Daily Living Activities (DLA) Scale
