Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered	Sick population
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Languedoc-Roussillon Midi-Pyrénées
Detail of the geography area	Midi-Pyrénées
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2001
Size of the database	
Size of the database (number of individuals)	Greater than 20 000 individuals
Details of the number of individuals	700,000
Data	
Database activity	Current data collection
Type of data collected	Clinical data Biological data Administrative data
Biological data (detail)	Diagnosis
Administrative data (detail)	Socioeconomic (EDI); patient profile (sex, age, type of emergency service, duration of stay, reason for use, admission day and month).
Presence of a biobank	No
Health parameters studied	Health care consumption and services
Care consumption (detail)	Medical/paramedical consultation
Procedures	
Data collection method	Data gathered by treatment staff in one of 37 public or private establishments in the Midi-Pyrénées region.

Participant monitoring	No
Links to administrative sources	Yes
